There's need in legislation for farming loans for upstart expenses to silvopasture (planing of trees in Vermont's 151 square miles of wo pastures.). Silvopasture increases farm income 10%, increases CO2 sequestration 500-1000%, increases milk production 10%, increases meat quality, and gives farmers additional crops of nuts, maple sap, fruits and mushrooms. Cattle are more protected from sun and wind.
