Definitions

Individual in recovery – is a person that is in the process of change to improve their health and wellness, live a self-directed life, and strive to reach their full potential.

Substance use disorder, as defined by Substance Abuse and Mental Health Services Administration (SAMHSA) - the recurrent use of alcohol and/or drugs causing clinically significant impairment, including health problems, disability, and failure to meet major responsibilities at work, school, or home.

Mental Illness (SAMHSA) - is someone over the age of 18 having (within the past year) a diagnosable mental, behavior, or emotional disorder that causes serious functional impairment that substantially interferes with or limits one or more major life activities.¹

Serious Emotional Disturbance (SAMHSA) – is someone under the age of 18 having a diagnosable mental, behavioral, or emotional disorder in the past year, which resulted in functional impairment that substantially interferes with or limits the child's role or functioning in family, school, or community activities.²

Recovery Residence - means a safe, sober living environment that support persons recovering from a substance use disorder in a single-family home(s) or apartment that provides:

- peer support with the environment that prohibits the use of alcohol, use of prescription drugs in a manner other than as prescribed and other illegal substances.
- assistance accessing support services to persons recovering from substance use disorder.
- a residence certified by the Vermont affiliate of National Alliance for Recovery Residences and adheres to the national standards established by the Alliance or its successor in interest.
- or an individualized unit that meets the standards of the Agency of Human Services for supporting individuals with substance use disorders.

Level 1 – Peer Run recovery residence democratically run, drug screenings, self-help meetings encouraged house meetings, there is no paid position within the residence.

Level 2 – Monitored recovery residence with a formal operator and staff where the individuals in recovery are most likely working (employed). House rules provide structure, services are peer run groups and involvement with self-help treatment services.

Level 3 – Supervised recovery residence with formal oversight with a facility manager and certified staff or case managers available. Life skill development, clinical services utilized in outside community and services hours provided in house.

Level 4 – Service Provider Recovery Residence recovery residence with the highest degree of support and structure and is best for individuals new to recovery and may need clinical services and program, life skills development, credentialled staffing and may be a more institutional environment.

¹ The definition is from Substance Abuse and Mental Health Services Administration (SAMHSA)

² The definition is from SAMHSA

Program Summary

The Federal Register Notice No. FR-6225-N-01 as authorized under Section 8071 of the SUPPORT for Patients and Communities Act, entitled Pilot Program to Help Individuals in Recovery from a substance use disorder become stably housed, herein referred to as the Recovery Housing Program (RHP). The pilot program authorizes assistance to grantees (states) to provide stable, temporary housing to individuals in recovery from a substance use disorder. Federal Register Notice No. FR-6225-N-01 provides how the FY2020 allocation shall be used and administered. Federal Register Notice No. FR-6265-N-01 is the updated Notice to the Support Act to provide the instructions for submitting the Action Plans for FY2020 and 2021.

The State of Vermont's 2020 Recovery Housing Program Action Plan will guide the use of approximately \$753,000 of the first allocation and \$791,652 of the second allocation³ in Recovery Housing Program (RHP) funding received by the State through the U.S. Department of Housing and Urban Development's Community Development Block Grant Program (CDBG) for the period July 1, 2021, through September 1, 2028. These funds are administered by the Agency of Commerce and Community Development (ACCD), Department of Housing and Community Development (DHCD) that administers the State's CDBG funding. There will be collaboration with the Agency of Human Services. A staff person from the Division of Substance Use (DSU) and a staff person from Department of Corrections (DOC) will participate in the review and selection process of the applications.

The first amendment incorporated the third allocation of \$755,059 from FY22. This second amendment will incorporate the fourth allocation of \$991,106 from FY23.

This plan identifies the State's priorities and needs for transitional housing for persons recovering from substance use disorder based on an extensive needs' assessment, and citizen and stakeholder input. It establishes goals for meeting the priority needs for the period of funding and reflects anticipated resources and outcomes.

The State will use RHP funding to provide safe and supportive transitional housing to persons recovering from substance use disorders through Recovery Residences (RR) that are certified recovery homes through the Vermont Alliance for Recovery Residences, the Vermont Affiliate of the National Alliance for Recovery Residences, or individualized units that meet the Agency of Human Services standards. Persons in recovery will have peer support, access to services, and integration into the community with the goal of moving to permanent, independent housing.

Vermont's Substance Use Epidemic

Vermont continues to struggle with the opioid addiction epidemic and our state's 2023 mortality rate continues to rise and surpass last year's numbers. With the new potent drugs to hit our streets, the Vermont Department of Health has seen increased involvement of xylazine and gabapentin in the fatal opioid overdoses. Narcan cannot help to reverse the effects of xylazine, but it is still recommended in suspected overdoses as it will reverse the effects of the opioid which the xylazine is mixed with.

³ For purposes of expediency, the Action Plan will present both allocations pending receipt of the Federal Register specific to the second allocation.

According to an article in Seven Days in June 2023, Burlington Vermont overdose was up 250 percent by May 15, 2023, from the previous year.

In August 2023 over 90 organizations and 10 speakers came together at a substance addiction summit that focused on healing from substance addiction, community building and breaking down barriers to equitable access to substance use disorder treatment.

October 2023 a compassion fatigue podcast by Burlington firefighters and EMT was posted that included their struggles and challenges they are experiencing with the epidemic and request for additional community and state supports to try something new to help individuals suffering from substance use addiction because more tools are needed to be able to make a difference. Due to the challenges Burlington launched a new overdose response and outreach pilot program in the fire department to act as a bridge to connect people to other, long-term services in the area. The program is being paid for with City Opioid Settlement Funds. They will collect data for 6 months to determine if the program will become permanent.

The state continues to hear the need for additional detox beds throughout the state to help stabilize individuals suffering from substance use disorders and try to get them to a point, so they are ready to enter treatment. This activity is currently not an eligible use of RHP funding.

The Department of Housing and Community Development is currently working on their statewide housing needs assessment which will provide an estimate of persons that are not homeless but require supportive transitional housing for individuals suffering from substance use disorders and will provide an inventory of housing available and needed.

The Department of Substance Use is also currently working on a needs assessment of their entire care system which will also include recovery housing component that should be completed in two years.

Vermont's Recovery Residency Needs

Downstreet Housing & Community Development received funding from Vermont Housing and Conservation Board (VHCB) to work with a consultant to conduct an assessment of the needs for recovery residences in Vermont. The study "HOUSING: A CRITICAL LINK TO RECOVERY, An Assessment of the Need for RECOVERY RESIDENCES in Vermont" was completed in February of 2019, *Appendix A*.

According to the study done by Downstreet the State of Vermont has beds to meet the needs of only 2% of the state's recovery population. There are only 212 beds throughout the state to serve individuals in

recovery, with the potential to serve 425 individuals annually. There are roughly 1,200 Vermonters annually that enter substance use disorder treatment. To adequality meet the demand 300 additional beds are needed statewide. The study found the highest unmet need was facilities for women in recovery with dependent children. The plan also identified the need for 34 more recovery residences (RR) outside Chittenden County that include outpatient treatment services. The study recommended the following locations and types of recovery residences needed in Vermont:

- Rutland City: one RR dedicated to men, and one dedicated to women and/or women with dependent children.
- St. Albans City: one RR dedicated to men and one dedicated to women and/or women with dependent children.
- Barre/ Berlin (Montpelier): one RR dedicated to women and/or women with dependent children.
- Burlington and/or South Burlington: one RR dedicated to women with dependent children.
- St. Johnsbury: One RR dedicated to women and/or women with dependent children.
- Morrisville: one RR dedicated to men.

The plan also outlined the need:

- to strengthen the delivery of wrap around services by strengthening the network of services providers that play a role with the recovery residence and its residents;
- to develop projects at a pace that ensures a strong seasoned and well-trained mentors, coaches, and case managers;
- to stress the importance of community and self-worthiness and belonging to the residents; to find sustainable funding to bridge the gap between operational costs and the limited capacity of most residents to cover that cost;
- to invest in community organizations and messaging aspects to manage expectations and build capacity and resiliency needed to address the inevitable setbacks residents of recovery residences will have; and
- to find ways to reduce capital risk associated with acquiring and substantially renovating properties as recovery residences that may need to change.

The Agency of Human Services (AHS) – Department of Substance Use is currently working on a needs assessment for their entire care system which will include data on recovery housing needs.

The following is current legislation being discussed before Vermont Legislature:

- S.186 requesting AHS Department of Health to propose a voluntary certification process for recovery residences.
- H.72 An act relating to a harm-reduction criminal justice response to drug use to allow overdose prevention centers.

The Agency of Commerce and Community Development (ACCD) – Department of Housing and Community Development (DHCD) is currently working with the Vermont Housing Finance Agency (VHFA) on their 5-year housing needs assessment required by United States Department of Housing and Urban Development (HUD), which will touch some on the recovery housing needs for the state.

Vermont Recovery Advocacy

The **Vermont Association for Mental Health and Addiction Recovery (VAMHAR)** is a statewide information and advocacy organization that supports all paths to recovery from substance use disorder and mental health conditions. (https://vamhar.org/) VAMHAR supports the following Programs:

- Recovery Vermont trains Vermont's recovery workforce through the Vermont Recovery Coach Academy. It is the home of some of the most innovative Recovery Specialty Trainings in the country, including their recovery coaches in the Emergency Department and Family Recovery Coach trainings. It was one of the country's first training and certification programs. Recovery Vermont provides information services to certified recovery residences, advocates through awareness campaigns, trainings, and events, and works every day to end the stigma of SUD across Vermont and beyond. Recovery Vermont works to ensure that people in recovery have a robust workforce opportunity and a diverse network of supports to stay strong in their recovery. (https://recoveryvermont.org/)
- Vermont Alcohol & Drug Information Center (VADIC) is a program supported by a grant from the Vermont Department of Health, Division of Alcohol & Drug Abuse Programs that provides publications and resources that are free to all Vermonters. (https://vadic.org/)
- **Camp Daybreak** is a residential summer camp for Vermont Kids ages 8-11 with a range of social emotional and behavioral needs. (https://campdaybreak.org/)

Vermont Alliance for Recovery Residences (VTARR) was established out of a need to evaluate and monitor standards-based recovery support services provided in community residential settings throughout Vermont. A recovery residence is a shared living residence providing an environment free of alcohol and illicit drugs, as well as peer support and connection to resources, for persons recovering from substance use disorders. The organization supports those in recovery from alcohol dependence and substance use disorder by improving access to safe quality-based recovery residences through established standards, a fair and transparent certification process, community engagement, education, technical assistance, research, and advocacy.

The organization's Board of Directors sets the course of direction and employs a qualified Executive Director with expertise in substance use disorder and housing supports. Programming is centered around engaging with recovery residence owners and operators, the community, public officials, and treatment providers in the State of Vermont to: (a) increase and otherwise expand the availability and affordability of structured housing opportunities for individuals in recovery from substance use disorders; (b) provide organizational support and knowledge-based resources to the operators of recovery residences in Vermont; (c) assist the operators of Vermont recovery residences in their efforts to comply with standards, best practices and a code of ethics in regard to the delivery of residential recovery services, and all federal, state, and local laws and regulations that may be applicable to residential recovery residences; (d) ensure that high quality residential recovery housing options are available to those in the community who struggle with substance use disorders, including, without limitation, by inspecting and certifying such residences; and (e) assist in the promotion of greater awareness among the public about the need for, and effectiveness of, residential support and recovery services for individuals struggling with substance use disorder.

Initial and ongoing funding has been supported through the Federal Government via the State Opioid Response Grant managed by the State of Vermont's Health Department of Health and Substance Use Programs.

VTARR currently has less than 100 beds throughout the State of Vermont. There are new resources coming online in Rutland, Barre and Bennington in the near future.

Most programs are currently completely full. We have not seen this for years. There has been catastrophic growth in overdose deaths as we talk about the need for resources such as recovery residences. See the following news article that speaks to the increased number of opioid death: https://www.vermontpublic.org/vpr-news/2022-04-12/vermont-health-officials-confront-record-number-of-opioid-overdose-deaths

Below is a listing of recovery residences certified through VTARR in Vermont. (https://www.vtarr.org/recovery-residences.php)

<mark>Winooski</mark>	Dismas of Vermont

Dismas House is no longer certified by VTARR. They have elected to no longer be certified.

Substance Misuse Prevention and Oversight and Advisory Council (SMPC) is a council established by 18 V.S.A § 4803. The Department of Health serves as the liaison between SMPC and the Governor's office. The purpose of SMPC is to improve state prevention policies and programs to improve the health outcomes of all Vermonters through a consolidated and holistic approach to substance misuse prevention that addresses all categories of substances. This Council provides advice to the Governor and General Assembly for improving prevention policies and programming throughout the State and to ensure that population prevention measures are at the forefront of all policy determination.

A cross-disciplinary workgroup of the Central Vermont Prevention Coalition is meeting regularly to address the lack of a short-term stabilization/respite resource for people seeking treatment and recovery for drug and alcohol use in our region and State. Currently, the only similar resource in the State is Act 1/Bridge in Chittenden County. The group's ultimate goal is to establish such a resource for Central Vermont with a vision for wider adoption across the entire State of Vermont. We envision a resource that is immediately available regardless of acuity that connects people with wrap-around services including mental health and post-respite plans for housing, treatment, recovery, and so on.

Vermont Recovery Network Recovery Partners of Vermont

The Vermont Recovery Network mission is to help people who have experienced problems with substance use disorders to find, maintain, and enhance their recovery through peer supports, sober recreation, and educational opportunities. A recovery-oriented system of care that supports self-directed pathways to recovery by building on the strengths and resilience of individuals, families, and communities. Recovery centers are places for people looking for assistance with recovery to find information about recovery and substance abuse services in a drug and alcohol free environment and to find people who have direct personal experience with the recovery process.

The Vermont Recovery Network is no longer in business. It has been replaced by Recovery Partners of Vermont (https://vtrecoverynetwork.org/) - it now makes up all recovery centers, all certified recovery residences, and the Vermont Alliance for Recovery Residences. On July 1, 2021, the Vermont Recovery Network, made up of Vermont's Recovery Organizations was faced with a huge challenge. The Executive Director left her position and the state decided to pull all funds from the organization. What was going to happen? A new Executive Director was hired to either help close the organization or determine what were its next steps. After speaking with many of the Executive Directors of the Recovery Organizations, it was clear they wanted an organization to represent their interests moving forward. Thus became the birth of the Recovery Partners of Vermont. The new name of the organization and so much more, unfolded over the next 5 months. The direction of the Recovery Partners of Vermont quickly emerged. The leadership of the member Recovery Organization, nine in total, came up with specific tasks for the staff of the Recovery Partners of Vermont.

The Recovery Partners of Vermont mission is to support their member recovery organizations such that they can be world-class establishments empowering all Vermonters and their families who are in recovery from alcohol or other substance use disorders. They envision a recovery-oriented system of care that supports self-directed pathways to recovery by building on the strengths and resilience of individuals, families and communities.

Vermont Recovery Service Centers

Below are the twelve Service Centers in the Vermont Recovery Network throughout the state that assist individuals in recovery through peer supports, sober recreation, and educational opportunities. Each center is an independent 501c3, many of whom have, or are exploring, recovery residences as part of their mission. Recovery Vermont partners with the centers and provides training for their staff. The challenge is there are communities where there are service centers but non-existent recovery residences.

Vermont Department of Health

Recovery Residences

Recovery Residences that provide peer support offers credibility and accountability through lived experience and has been proven as an important bridge between treatment and successful long-term recovery. The strength of recovery-focused housing is its ability to provide ongoing peer support while promoting sobriety in a natural home environment or medical facility depending on the number of residents, according to SAMSHA.

Research has shown that individuals with substance use disorder who utilize recovery residences demonstrate a greater chance of achieving long-term recovery than those who do not live in a recovery-oriented environment. Evidence demonstrates decreased substance use, reduced probability of relapse, lower rates of incarceration, increased employment, and improved family functioning. Further, VTARR and NARR certification standards embrace evidence-based approaches including best practices established by Substance Abuse and Mental Health Services Administration (SAMHSA).

Vermont Foundation on Recovery (VFOR)

Vermont Foundation on Recovery (VFOR) mission is to create a network of Recovery Homes (clean and sober living homes) to help people suffering from substance use disorder, re-assimilate into society by supporting the transitions from active use to recovery, to independent living. VFOR currently has 56 beds across eight homes. Since VFOR's opening in 2014, 680 people have been served.

Currently VFOR charges \$160 a week per person in Chittenden County, and \$150 a week outside of Chittenden County, and \$700/month per person for the transitional apartments. Membership dues do not fully cover VFOR's operational costs. Currently the organization budgets for about 36% of their revenues from membership dues paid by the individuals in recovery who live in the homes. A more sustainable solution for the organization would be if they only had to rely on 25% of their revenues coming from membership dues, due to the potential inability for individuals in recovery to pay.

VFOR is currently working with several communities in Vermont to create additional recovery residences and to increase bed capacity throughout the state. Individuals with substance use disorders can apply for VFOR housing at https://www.vfor.org/.

Below is a listing of current VFOR recovery residences.

Community	Location	Serves	Beds
Barre, VT	Keith Avenue	Women w/Children	10 beds
Essex, VT	Fort Ethan Allen, 2 Homes	Men & Women	14 beds Men &
			8 beds Women
Essex, VT	<mark>Lincoln Street</mark>	<mark>Men</mark>	<mark>7 beds</mark>
Morrisville, VT	Maple Street	Women	5 beds
Rutland, VT	North Main Street	Men	7 beds
St. Albans, VT	Lake Street	Men	8 beds
St. Johnsbury, VT	Elm Street	Men	6 beds
Coming Soon 2024			
Essex, VT	Fort Ethan Allen	Men & Women	2 beds Men &
			8 beds Women
Bennington, VT	North Street	Women	8 beds

Dismas House

Dismas House is a supportive community for former prisoners transitioning from incarceration. Dismas provides transitional housing for formerly incarcerated people and recruits university students and international volunteers to live in the house. Living in community accomplishes the Dismas mission of reconciliation and continues the original Dismas model. Dismas offers homes for both men and women and programs are located in Burlington, Rutland and Hartford.

Good Samaritan Haven

Good Samaritan Haven is a newly certified program by VTARR in Barre, VT. They received a preliminary certification as a new program. They run homeless shelters, but have created a recovery residences specific for those who are homeless and struggling with substance use disorder.

In 2023 the Good Samaritan Haven transitioned into a Recovery House, and today is home to folks who are committed to sober living. There are eight double occupancy rooms, and bath, shower, and laundry facilities are on site. Guests share a spacious living room, dining room, and kitchen and have some personal storage space. Guests must provide their own meals. Limited regular transportation to downtown Barre is provided daily.

Jenna's Promise Rae of Hope Sober Home

Jenna's Promise Rae of Hope Sober Home was created with the fundamental belief that people can recover from substance use disorder and trauma with the support of a positive community. The program currently has capacity for 6 women but is also working on expansion of access and transitional housing. At Rae of Hope, they ask that residents arrive with desire and motivation to embark on a holistic journey towards wellness. Their mission is to minimize barriers to success while empowering

residents to create a network of support. The home offers a trauma informed, structured housing approach, utilizing mental health/substance use treatment, education/vocation, and community connections to support client- centered recovery in substance use disorder and psychological trauma.

Willow Grove

Willow Grove is a supportive transitional residence for women who are in the early stages of recovery from substance use disorder. Established in 2004, Willow Grove offers family-style, substance-free housing for residents who work or volunteer and pay a modest fee for the opportunity to share living quarters with others who are on the same path. The average length of stay is 6-12 months while the resident is actively engaged in all of his/her recovery plan goals. The goal of their transitional housing program is for residents to strengthen the foundation of their recovery and move toward independent, productive lives.

Jacks House

The Second Wind Foundation operates Jack's House a program that supports men with children., Jacks House opened in 2021, a supportive transitional residence for men who are in the early stages of recovery from substance use disorder. Jack's House offers family-style, substance-free housing for residents who work or volunteer and pay a modest fee for the opportunity to share living quarters with others on the same recovery path. The average length of stay is 6-12 months while the resident is actively engaged in all of his/ her recovery plan goals. The goal of the Jack's House program is for residents to strengthen the foundation of their recovery and move toward independent, productive lives.

Agency of Human Services (AHS)

Department of Corrections (DOC)

The Agency of Human Services - Department of Corrections has aligned its grant-funded housing portfolio with a theory of change that optimizes for Housing First and scattered site approaches while still maintaining some congregate settings throughout the state. Housing First is a permanent supportive housing model that has been identified by several federal institutions, including the Department of Housing and Urban Development (HUD), the Substance Abuse and Mental Health Services Administration (SAMHSA) and the Veterans Administration (VA), as a best practice in promoting housing stability among extremely vulnerable populations.

- Housing Model: facilitate permanent housing (short-long term rental assistance and link to vouchers) and integrate supportive services to participants that choose to engage toward their goals.
- Re-entry & Case Management Model: focus on the individuals and communities needs by
 providing the appropriate level of supervision based on risk, while having strong connections to
 probation and parole, mental health, substance use treatment, and supportive services. Utilizing
 restorative justice, harm-reduction and trauma informed principles.

For more information regarding DOC's transitional housing go to their website: https://doc.vermont.gov/content/transitional-housing.

Department of Health (DOH), Division of Substance Use Programs (DSU)

The Department of Health is Vermont's Single State Agency (SSA) who works with and administers funding from the Substance Abuse and Mental Health Services Administration (SAMHSA). DOH leads

public health efforts to advance the behavioral health of the state and to improve the lives of individuals living with mental and substance use disorders, and their families.

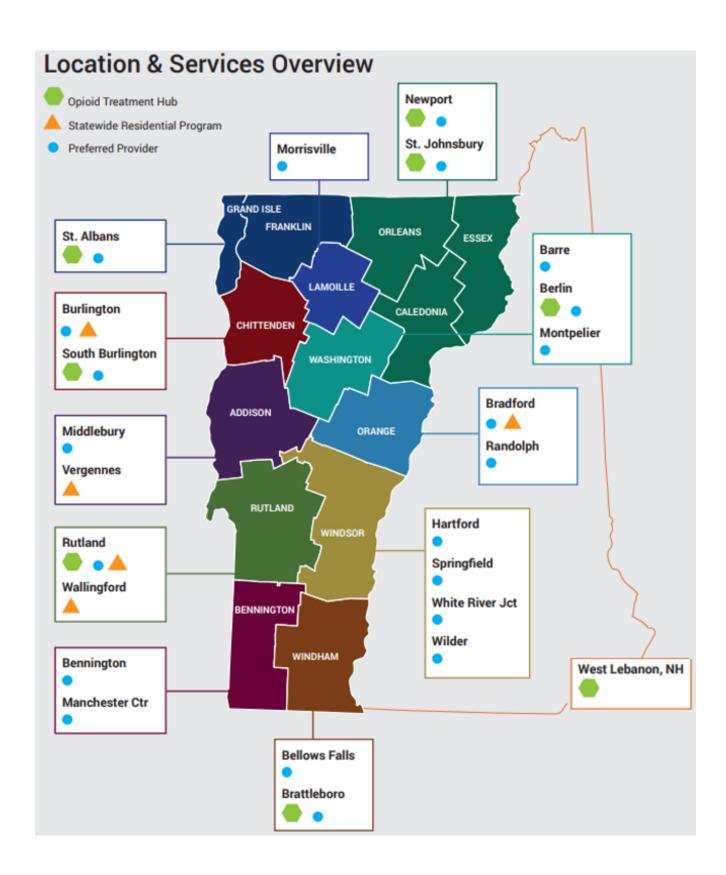

DSU supports a network of community partners to promote and deliver a wide range of substance misuse information, prevention, intervention, treatment and recovery programs and services. DSU funds services from school-based prevention services to the Care Alliance for Opioid Addiction, Hub & Spoke model of treatment and coordinates with professionals to support healthy lifestyles for Vermonters of all ages.

DSU funds the <u>VT Helplink Alcohol & drug support center</u> which provides free support and referral services that is accessible by phone or online to AIRS certified clinicians that are knowledgeable of Vermont's Recovery system.

AHS Hub & Spoke Opioid System

Vermont's Opioid Use Disorder Treatment System

Hub and Spoke is Vermont's system of Medication for Opioid Use Disorders, supporting people in recovery from opioid use disorder. There are nine Regional Hubs that offer daily support for patients with complex addictions. In over 75 local Spokes, doctors, nurses, and counselors offer ongoing addiction treatment fully integrated with general healthcare and wellness services. This framework efficiently deploys addictions expertise and helps expand access to opioid user disorder treatment for Vermonters.

Medication for Opioid Use Disorders (MOUD): The Evidence-Based Approach to Opioid Addiction Medication for Opioid Use Disorders (MOUD) uses medication such as methadone and buprenorphine, as part of a comprehensive opioid use disorder treatment program that includes counseling. Medication for Opioid Use Disorder is not the only treatment for opioid addiction, but it is the most effective treatment for many people. It is supported by the American Medical Association, the American Academy of Addiction Psychiatry, and the American Society of Addiction Medicine. Federal regulations designate two settings where Medication for Opioid Use Disorder can take place, Opioid Treatment Programs (OTPs) and Office Based Opioid Treatment (OBOT) settings. Vermont takes this structure as a starting point to strengthen and connect the elements to support people for recovery.

Hubs Offer Intensive Treatment for Complex Addictions

Hubs are Opioid Treatment Programs, with expanded services and strong connections to area Spokes. There are currently 9 Hubs in Vermont. Each Hub is the source for its area's most intensive opioid use disorder treatment options, provided by highly experienced staff.

- Hubs offer the treatment intensity and staff expertise that some people require at the beginning
 of their recovery, at points during their recovery, or all throughout their recovery.
- Hubs provide daily medication and therapeutic support.
- Patients receiving buprenorphine or vivitrol may move back and forth between Hub and Spoke settings over time, as their treatment needs change.
- Hubs offer all elements of Medication for Opioid Use Disorders, including assessment, medication dispensing, individual and group counseling and more.
- Additional Health Home supports are made available at Hubs through the staffing and payment model. These health home services include case management, care coordination, management of transitions of care, family support services, health promotion, and referral to community services
- In addition to treating their own patients, Hubs offer trainings and consultation to the Spoke providers.

Spokes Provide Ongoing Treatment in Community Settings

Spokes are Office Based Opioid Treatment settings, located in communities across Vermont. At many Spokes, addictions care is integrated into general medical care, like treatment for other chronic diseases.

- The Spokes are mostly primary care or family medicine practices, and include obstetrics and gynecology practices, specialty outpatient addictions programs, and practices specializing in chronic pain.
- Prescribers in Spoke settings are physicians, nurse practitioners, and physician's assistants federally waivered to prescribe buprenorphine. They may also provide oral naltrexone or injectable Vivitrol.
- People with less complex needs may begin their treatment at a Spoke, other patients transition to a Spoke after beginning recovery in a Hub.
- Spoke care teams include one nurse and one licensed mental health or addictions counselor per 100 patients. These Spoke staff provide specialized nursing, counseling and care management to support patients in recovery, this staff assures team-based care and helps primary care providers balance MAT patient care with the needs of their full patient panel.

State Oversight, Supplemental Funding, Quality and Measurement Support

- The Hub & Spoke concept was first introduced by John Brooklyn, MD and the model was
 designed and operationalized by the State of Vermont through the Blueprint for Health, the
 Department of Vermont Health Access, and the Vermont Department of Health's Division of
 Substance Use Programs.
- The State of Vermont pays for Hub and Spoke services via Medicaid. The Hub programs bill a monthly bundled rate, and the Blueprint distributes funds to support Spoke staffing through its existing Community Health Team payment infrastructure.

- The State of Vermont provides oversight for the program, helping communities monitor treatment needs, waitlist length, average time to treatment, and program performance.
- The Blueprint for Health provides each Vermont community with a data profile showing Hub & Spoke patient demographic data and key program measures, to support data-driven quality improvement.

Evidence of Program Impact

- Access to treatment has grown since program inception, with more than 6000 people now participating.
- The Blueprint for Health uses claims and clinical data to evaluate program impact and program costs. The Blueprint is working with other state agencies to incorporate additional data, such as Corrections data, into its evaluation.
- A peer-reviewed article published in the journal Substance Abuse Treatment showed that health
 care costs for Vermonters receiving Medication for Opioid Use Disorders (MOUD) were lower
 than for Vermonters with opioid addition not receiving MOUD, even when including the
 substantial treatment costs. Individual and group counseling, and more.

Vermont Harm Reduction Programs

Vermont CARES works for and with Vermonters affected by HIV/AIDS to promote wellbeing through a continuum of prevention, support, and advocacy services. VT CARES manages a syringe service program, provides testing for HIV and HEP C, has a new Prevention program called "Let me PrEP u" and has a mobile unit that travels around the state to be able to assist Vermonters with their services. (https://vtcares.org/)

AIDS Project of South Vermont is a regional AIDS service organization that provides direct services to people living with HIV/AIDS, and prevention services to those at high risk in Windham, Bennington, and southern Windsor counties. (http://www.aidsprojectsouthernvermont.org/)

Howard Center Safe Recovery Programs distributes free Fentanyl test strips and Narcan overdose reversal kits. The program also offers HIV and Hepatitis C testing, syringe exchange program, Hepatitis A and B vaccines, abscess and wound care, legal clinic, treatment options counseling and low barrier, and medication-assisted treatment (buprenorphine). (https://howardcenter.org/substance-use/needle-exchange-free-hiv-hepatitis-screening/)

HIV/HCV Resource Center distributes fentanyl test kits and Narcan/naloxone, provides services to persons living with HIV, offers HIV and Hepatitis C testing to persons in Orange and Windsor counties in Vermont. (http://www.h2rc.org/)

Co-occurring Disorders

It is important to note that many individuals with substance use disorders may also have challenges with multiple disorders. It is common for many to have mental health issues such as anxiety, eating disorders, mood-related disorders, trauma related issues, psychoses, along with alcohol or drug addiction. Sometimes these disorders are genetic. It is helpful for staffing of recovery residences to understand mental illness and substance use disorders behaviors and treatments. To be effective for the individual in recovery, the dual conditions should be treated at the same time.

Goals

Vermont's Recovery Housing Programs goals are to support:

- Levels 1, 2 & 3 Recovery Residences certified by VTARR.
- Individualized Units that meet AHS DOC standards.
- Creation of Recovery Residences in service HUB areas where none exist.
- Recovery Residences with priority given to parents with children.
- Recovery Residences that include programs that have wrap around services for long term recovery that are onsite or in the vicinity of the home.
- Individuals will transition to permanent independent housing within two years of entry to the Recovery Residences

Access to Recovery Residences

The individuals accessing the recovery residences would be individuals that have reached a sober point where they are ready to start working with service providers on their journey to recovery. The recovery residence units developed from this funding source are done in conjunction with VTARR, AHS, VFOR along with wrap around support from service providers.

To see what is available for beds the individual should first contact VTARR at https://www.vtarr.org/recovery-residences.php. On that page, select a Recovery Residence in the area of interest in potentially applying to, it will bring up details about that program. To find out more information about the program selected, select the residence website which will bring them to the programs page and provide links to apply to access a bed. If assistance is needed with the application process individuals can work with their local service provider or contact the program of interest and they will walk individuals through the process.

Individuals can also call 211 to gain access to VFOR recovery residences listed on the "Substance Use Disorder Services" tab as well as on the resource search list. On the 2-1-1 site, you can search for resources by entering your zip code, a keyword of what you're looking for (i.e. Recovery, Recovery Centers, Recovery Residences), and it will pull up everything that is available. VFOR is listed in each zip code where a recovery residence exists.

VT Helplink is an additional free resource for Vermonters, providing confidential, non-judgmental support and referrals to treatment, recovery, and other services. VT Helplink Specialists can help individuals navigate Vermont's treatment and recovery system as well as assist individuals in finding a VFOR recovery residence in their community. To access VT Helplink, call 802.565.LINK or visit www.vthelplink.org and connect via live chat on the homepage.

Resources

Other Federal Resources

Although there is not a direct set aside of Vermont's regular Community Development Block Grant (CDBG) program annual funding for Recovery Housing Program (RHP) projects, they will be given preference due to meeting a housing need which is a higher priority in the State's Consolidated Plan.

Housing developers may be able to utilize the following federal funding sources when developing transitional housing Recovery Residences:

- NeighborWorks of America
- USDA Rural Development -community facility grants or low interest loans.
- Affordable Housing Program Federal Home Loan Bank of Boston (AHP)

State Resources

The Department of Corrections annually funds some transitional housing for persons coming out of incarceration that supports persons in recovery.

The Vermont Housing and Conservation Board has funding available to assist with transitional housing.

Some municipalities have revolving loan funds from previous HUD funding that may be available.

Efficiency Vermont is also a resource for housing developers to utilize to assist the recovery residence with any energy efficiency needs.

Administration Summary

DHCD will be the responsible agency for overall administration and will use existing staff to administer the Program. There will be collaboration with Vermont's Single State Agency (SSA), the Agency of Human Services/Department of Health. A staff person from the Division of Substance Use (DSU) and a staff person from Department of Corrections (DOC) will participate in the review and selection process of the applications.

Use of Funds - Methods of Distribution

Minimum \$100,000 Maximum \$1,000,000

Open to all communities in Vermont, including the states only entitlement community City of Burlington.

FY2020 Total Award	\$753,000
-5% General Admin	\$ 37,650
- 3% Technical Assistance	\$ 22,590
Total amount to Grant Out	\$692,760
FY2021 Total Award	\$791,652
-5% General Admin	\$ 39,583
- 3% Technical Assistance	\$ 23,749
Total amount to Grant Out	\$728,320
FY2022 Total Award	\$755,059
-5% General Admin	\$ 37,753
- 3% Technical Assistance	\$ 22,651
Total amount to Grant Out	\$694,655
FY2023 Total Award	\$991,106
FY2023 Total Award -5% General Admin	\$991,106 \$ 49,555

Total available to grant to projects from FY20 & FY21 & FY22 & FY23 allocations: \$3,027,556.

Lease, Rent and Utilities activities are not limited to the 15% Public Service CAP.

30% Expended Within One Year of Executed HUD Grant Agreement

The 30% expended by date for FY20 and FY21 was January 17, 2023. The total amount needing to be expended for FY20 is \$225,900 and FY21 is \$237,496, totaling \$463,396.

The 30% expended by date for FY22 is March 27, 2024, with \$226,517.70 needing to be expended.

Use of Funds - Activities Carried Out Directly

Eligible Entities to Apply

All Vermont municipalities are eligible to apply for Recovery Housing Program funding.

National Objective

All projects must meet the Low- and Moderate-Income Limited Clientele national objective which requires at least 51% of the individuals served be at/or below 80% of area median income.

If a project serves individuals that meet the criteria below they are automatically are presumed Lowand Moderate-Income Limited Clientele:

- Persons that meet the federal poverty limits
- Persons insured by Medicaid
- Abused children
- Battered spouses
- Elderly persons (55 and older)

- Severely disabled persons
- Homeless persons
- Illiterate adults
- Persons living with AIDS
- Migrant farm workers

The Slums and Blight (SB) and Urgent Need (UN) national objectives are not eligible.

Eligible Activities

- Public Facility Improvements Acquisition, construction, reconstruction, rehabilitation or installation of public facilities and improvements for the purpose of providing stable, temporary housing for individuals in recovery from a substance use disorder.
- **Acquisition of Real Property** For the purpose of providing stable, temporary housing to persons in recovery from a substance use disorder.
- Lease, Rent & Utilities (only to LMI) associated costs on behalf of an individual in recovery from a substance use disorder for the purpose of providing stable, temporary housing. Payments must be made to the provider, such as the landlord or utility provider. Payments must NOT be made directly to individuals.
 - o RHP cannot supplant funds that previously covered for an individual.
 - o New or Expanded Service that have been above and beyond the last 12 months.
 - Assistance can be provided for up to 2 years or until the individual secures permanent housing, whichever is earlier.

• Rehabilitation and Reconstruction

- Single Unit publicly or privately owned residential building(s)
- Multi-Unit up to 2 or more units publicly or privately owned residential building(s)
- Public Housing owned or operated by a public housing authority.
- Disposition of Real Property Acquisition Disposition through sale, lease, or donation of otherwise
 of real property acquired with RHP funds for the purpose of providing stable, temporary housing for
 individuals in recovery from a substance use disorder.
 - Legal documented surveys for transfer of Ownership
- Clearance and Demolition Clearance, demolition, and removal of buildings and improvements, including movement of structures to other sites. Eligibility limited to projects where RHP funds are used only for the clearance and demolition.

- **Relocation** Relocation payments and other assistance for permanently or temporarily displaced individuals and families in connection with activities using RHP funds.
- **New Construction** Expansion of existing eligible activities to allow RHP funds to be used for new construction of housing. New construction of housing is subject to the same requirements that apply to rehabilitation activities.

Non-Eligible

- Operational Costs
- Paying for staffing
- Planning

Use of Funds - Evaluation and Criteria

Evaluation Process

The Pilot Recovery Housing Program (Dockets No. FR-6225-N-01 and FR-6265-N-01) funds shall be competitive and will ensure the eligible community development activities are met. The applications will be based on a system that measures the need, impact and feasibility of the proposed projects and will be scored using the scoring criteria below. RHP applications will be managed through DHCD's Webbased Application System known as GEARS. Applications are completed online and are submitted by municipalities.

DHCD staff will review each application for eligibility and completeness, before conducting a thorough analysis of each eligible applications and scoring them. AHS staff from DSU and DOC will also participate in the review and scoring process of the applications. DHCD staff will compile all the scoring of the applications by all the reviewers and will provide that documentation along with a recommendation to the Community Development Board. The CD Board reviews each application, analysis, compiled scores and makes funding recommendations to the ACCD Secretary on behalf of the Governor.

Criteria

The application must meet HUD's National Objective - Low- and Moderate-Income Limited Clientele.

Staff analyses of the applications are written based on Project Need, Project Impact and Project Feasibility. The selection criterion is as follows:

Scoring Criteria	Maximum Points
Project Need:	
Project response to documented need/issue	8
Project response to units near service hub and underserved by	
Recovery Residences	8
Project provides safe, healthy, and sober living environment	7
Design of program that provides holistic, wrap around services	7
Project response to units for parents with children	5
Project leverage of other resources	5
Total Need	40

Scoring Criteria	Maximum Points
Project Impact:	
Project LMI benefit	9
Readiness to proceed and obligate and expend funds within 4	
months	7
Community support for recovery housing	4
Coordination with state, local or regional service providers	4
Demonstrated data collection for outcomes	4
Use of green, energy efficient, and sustainable construction methods	2
Total Impact	30
Project Feasibility:	
Project adheres and will be certified to VTARR standards or unit	
meets AHS recovery programs standards	8
Project long term viability (reserves, cash flow coverage)	6
Project includes trained recovery housing staff (peer to peer)	6
Demonstrated capacity and experience to carry out the project	5
Project cost effectiveness and reasonability	5
Total Feasibility	30
Total Score	100

Each project assisted shall develop and provide model documents for their marketing materials, financial management process for operator, recovery services provided and recovery plans. Residents should be provided policies and procedures for medication treatment, fair housing, financial management, residential agreement, residents household responsibility, drug screening, relapse plans, confidentially laws, and staffing/leadership plan. House rules are typically established by the residents, once established a copy should be provided to each resident.

Anticipated Outcomes

Vermont anticipates being able to serve 4 or 5 projects between \$100,000-\$500,000 each out of FY2020, FY2021 and FY2022 allocations. Projects assisted will be required to provide data on the following outcomes:

Outcome Measures	Vermont's Projections
Number of Transitional Housing Units Created	0
Number of Transitional Housing Units Rehabilitated	17
Number of Transitional Housing Beds Created	66
Number of individuals assisted with transitional housing.	85
Number of individuals assisted with transitional housing	25
able to transition to permanent housing.	
Number of individuals with children assisted with	10
transitional housing.	
Number of individuals with children assisted with	3
transitional housing able to transition to permanent	
housing.	

Expenditure Plan

The state has received two applications through its regular CDBG program that are eligible and meet the scoring criteria of the Recovery Housing Program, and through the allowability of the act both projects are included under Pre-Award/Pre-Agreement Cost. The state will start receiving additional applications for the Recovery Housing Program in late summer with a Board meeting in early fall to award the remaining funds.

The state fully anticipates being in compliance with the requirement of expending 30% of funds from one year of the date of grant agreement executed with HUD due to the majority of its RHP 2020 funding being allocated under Pre-Award/Pre-Agreement Costs.

The ACCD is currently tracking staff hours specific to RHP and will include those expenditures under Pre-Agreement Costs.

Citizen Participation Summary

In developing the plan DHCD followed the states Citizen Participation plan and consulted with a broad range of local, regional and state organizations.

It should be noted that the Recovery Housing Program has been included in the State's Consolidated Plan and discussed since the allocation was announced as in 2019. The RHP was also more fully discussed at this year's public hearing on April 5, 2021, where it was brought to our attention that the maximum award per project should be no less than \$500,000. The reasoning was that it is so difficult to find all the funding sources to bring a project fruition that it takes so much time with smaller amounts. A larger amount can make a project more shovel-ready which is critical with a deadline to expend 30% of the funding within one year of signing the grant agreement with HUD.

The Draft Recovery Housing Plan was widely distributed by email to local, regional and state organizations and posted on the Agency's website on **May 25, 2021**, seeking comment through **June 11**, **2021**, to obtain citizens' views about how the plan addresses the needs for transitional housing for people recovering from substance use disorder in the state.

Comments

Vermonters for Criminal Justice Reform

- 1. Please consider omitting stigmatizing language such as "addiction" (better to use substance use disorder), "misuse" (better to use use), "clean and sober" (better to say in recovery).
- 2. This document reflects the perspectives of sober house operators, but it does not appear that feedback from sober house tenants or their advocates (like Vermont Legal Aid or Vermonters for Criminal Justice Reform) was solicited or included prior to this draft.
- 3. The proposed legislation included in the draft report as an attachment (and referred to in the narrative) is controversial and has not been enacted by the legislature. It is not appropriate to include, especially without that context.
- 4. The report does not clearly explain that sober house/recovery residence operators are private landlords, residents are tenants, and both are governed by standard Vermont landlord/tenant law. The report should use standard language relating to landlords, tenants and lease agreements, and should acknowledge that tenants cannot legally be removed from the residence without a court eviction order (the report seems to imply otherwise).

5. Overall, the report does not seem consistent with the Theory of Change policy being implemented by the Vermont Department of Corrections.

ACCD Actions Taken or Comments

- Modified the use of the word addiction to substance use disorder where appropriate. In some
 cases, the choice of the word's addiction, misuse and clean and sober are specific to the Agency
 or Organizations referenced.
- 2. We have participated with the Intervention, Treatment and Recovery Committee which includes members that are in recovery, as well as conversations with many individuals that are in recovery from substance use disorder.
- 3. The proposed legislation is merely referenced to inform our HUD officials of what the state of Vermont is currently reviewing to support recovery housing.
- 4. All congregate housing will need to be certified by Vermont Alliance for Recovery Residences (VTARR) as such are required to have resident agreements and therefore do not fall under the landlord tenant law. For the protection of all the residents in the home our plan does require a relapse plan for the removal of individuals. The plan requires measures to avoid people being homeless.
- 5. This plan is to encompass all individuals in recovery not just those coming out of incarceration. In consultation with Department of Corrections (DOC), there is a need for both the Theory of Change policy housing and supportive congregate housing.

Northeastern Vermont Development Association

As the Regional Planning Commission and Regional Development Corporation for the Northeast Kingdom, NVDA has developed goals, policies and strategies related to housing, energy, and economic development, which have relevance to the Recovery Housing Program Action Plan. We offer the following comments:

- 1. We support DHCD in its efforts to address the need for appropriate, stable housing for Vermont residents recovering from substance abuse.
- 2. We support the inclusion in the scoring criteria of added points for energy efficient construction, as weatherization and improved energy efficiency of the housing stock is also a goal in our regional plan.
- 3. We support the change in the model for recovery residences from congregate housing to individualized units, as discussed on page 6 of the Action Plan. While this is evidently in the best interests of those in recovery, it is also in the best interests of hosting communities. The individualized units model would allow RRs to blend in with market rate units, and benefit from a location close to services, commercial, civic, and active recreational uses. In time, if the units no longer functioned as RRs, they would be available to general tenancy without the need for modification.
- 4. Keeping in mind that funding programs and needs change while the rental unit remains, we recommend against the placement of permanent easements on new or renovated RR housing units that restrict the use or income of tenants in perpetuity.

5. To forward our regional plan's goal of supporting economically integrated communities and avoiding concentrations of poverty, we suggest that the scoring criteria take neighborhood context into consideration when selecting projects, i.e., locations with an existing high concentration of subsidized units should be avoided when siting recovery residences. Based on the information included with the Action Plan, the location of recovery residences in stable and economically integrated neighborhoods is also in the best interests of those in recovery.

ACCD Actions Taken or Comments

- 1. No Comment
- 2. Not Comment
- 3. This plan is to encompass all individuals in recovery. In consultation with DOC, there is a need for both individualized units and supportive congregate housing.
- 4. Easements will depend upon the other funding sources generally and their federal requirements.
- 5. Our emphasis is on locations near service HUB's where there are service providers for substance use disorders.

Town of Colchester

The housing outlined in their response was for housing the homeless during the COVID19 pandemic in hotels which impacted their emergency services. The Town of Colchester feels recovery housing would require a very high level of municipal services.

ACCD Actions Taken or Comments

Recovery Housing Program funding has come to the State of Vermont as a result of the Opioid Fatalities. The funding is to provide housing for individuals in recovery from substance use disorder. The housing will have mandated standards of drug-free, sober environment to support the individuals to stay in recovery and be active members of the community. The goal is for the individuals to move from transitional recovery housing to permanent stable housing.

Town of Shelburne

The housing outlined in their response below was for housing the homeless during the COVID19 pandemic in hotels which impacted their emergency services.

"Thanks for passing this along. Having given it a quick scan, my question is how and whether this all relates to the so-called temporary transitional housing that we have all been providing in what were previously tourism-related lodging establishments. It should be no secret that these locations have created skyrocketing numbers of calls for emergency services, exhausting our Police Department and Rescue Squad; and quite a few of these calls involve difficult circumstances and violence on a scale far beyond that which existed before this housing program. This is hardly limited to Shelburne; other area municipalities are experiencing similar, constant challenges.

Based on our experiences, we believe firmly that any existing or planned state programs for housing, recovery, or other similar matters must necessarily also include appropriate and necessary 24/7/365 oversight and management of these facilities and persons. These should not and cannot simply be left to municipalities to handle."

ACCD Actions Taken or Comments

Recovery Housing Program funding has come to the State of Vermont as a result of the Opioid Fatalities. The funding is to provide housing for individuals in recovery from substance use disorder. The housing will have mandated standards of drug-free, sober environment to support the individuals to stay in recovery and be active members of the community. The goal is for the individuals to move from transitional recovery housing to permanent stable housing.

Town of Milton

The Plan's eligible activities are reflective of the needs and appropriate strategic approaches to addressing the housing needs of those recovering from addiction. I support the Plan's list of parallel socioeconomic characteristics that will be used to presumably identify Low and Moderate-Income-Limited Clientele. I am especially supportive of the incorporation of holistic service strategies into the scoring system for projects because transportation, as one example, is important in a rural context to the viable effectiveness of a program serving this population.

Rural communities typically depend on neighboring regional nonprofit centers such as the Howard Center in Milton's local context, to assist those recovering from an addiction; and this makes transportation essential to accessing recovery services and other complementary services, particularly because there is limited public transit. Alternative transportation options also provide those recovering from an addiction with safe options to access services without risking encounters with law enforcement due to an expired driver's license or for other reasons.

The Federal 5311 program provides transportation services to LMI individuals, particularly the elderly, in order to access their doctor's appointments and other services. This program is particularly valuable in rural communities because of limited public transportation and because of the program's typical demand-response model. I wonder if a similar transportation model for those recovering from addiction specifically, could work as a holistic housing strategy in the future. Certainly, this plan leaves open enough room for such integrative housing projects to be considered.

ACCD Actions Taken or Comments

We recognize the challenges of transportation in a rural state such as Vermont. The Intervention, Treatment and Recovery Committee is currently discussing transportation issues for people in recovery and looking for ways to improve.

Vermont Legal Aid

ACCD Actions Taken or Comments

- 1. Request for commitment to tenancy protections and Department of Corrections (DOC) involvement:
 - a. The RHP action plan was drafted in consultation with DOC, and with Theory of Change principles in mind. DOC has further communicated that part of the Theory of Change is to provide multiple options for those seeking care. The RHP plan was drafted to provide for congregate housing that caters to individuals in need of specific care, as well as for individual units. After consultation with providers, it was determined that this congregate housing needs the ability to protect residents and maintain safe and supportive housing by removing residents who violate the terms of their stay. To mitigate effects of removal, the RHP plan requires that all participating recovery residences must have a plan in place with at least one alternative housing option for residents to ensure safe transitional shelter is available to any resident being removed.
- 2. Request to prioritize scattered site rather than congregate residences.
 - a. RHP allows for both types of housing. The Towns listed in the report identified the areas with highest need at that point in time in the Housing; A Critical link to Recovery report. RHP is not excluding any location in the state. The RHP Action Plan goal is to develop units near service HUB areas. RHP is not putting any permanent easement restrictions on the recovery housing units which may allow for alternative use in the future.
- 3. Discussion of H. 211:
 - a. At this time H. 211 has not been passed. The latest action in the Vermont House of Representatives on February 9, 2021. Further, the RHP plan requires that all participating recovery residences must have a plan in place with at least one alternative housing option for residents to ensure safe transitional shelter is available to any resident being removed.

St. Johnsbury Housing Committee

See attached comments.

ACCD Actions Taken or Comments

The RHP Action Plan goal is to develop units near service HUB areas. RHP is not putting any permanent easement restrictions on the recovery housing units, which would allow for future alternative use. RHP allows for both congregate housing and individual units to be developed. ACCD acknowledges the need for more affordable housing across Vermont. The RHP budget is limited and as such is concentrated on helping a particular group in need, versus generally addressing affordability.

Robert A. Oeser

See comments attached.

ACCD Actions Taken or Comments

The RHP action plan was drafted in consultation with DOC, and with Theory of Change principles in mind. DOC has further communicated that part of the Theory of Change is to provide multiple options for those seeking care. The RHP plan was drafted to provide for congregate housing that caters to individuals in need of specific care, as well as for individual units, to support a diversity of housing options. The RHP plan requires that all participating recovery residences must have a plan in place with at least one alternative housing option for residents to ensure safe transitional shelter is available to any resident being removed.

John S. Rogers

My name is John Rogers and I'm a member of the community in Bennington County. I run a 12-step program in Bennington (Celebrate Recovery, Bennington), sit on the local CoC, represent the county on the Vermont Coalition to End Homelessness and recently joined the board at VFor. I'm in longterm recovery and have been active in the recovery community in our small corner of the state. I know the former Executive Director at DownStreet and appreciate the study that was conducted in 2019 attempting to identify the need across the state. While I agree with most of what is proposed in the study I do think the 2015-16 SAMSHA used to project the number of beds needed is out of date and feel skipping Bennington Country as a place that needs Recovery Residence support is an oversight. From my analysis (attached) we are in need of 45-50 beds in Bennington County. Your draft action plan looks solid, the only correction I would have is to broad the geographic scope of the goal to include Bennington. Take a look at the attached we are getting some good traction in the community around Recovery Housing and with the necessary funding should be in a position to open two residences (1 men and 1 women/women w/kids) in 2022.

Thanks for the consideration.

ACCD Actions Taken or Comments

The Towns listed in the report identified the areas with highest need at that point in time in the Housing; A Critical link to Recovery report. RHP is not excluding any location in the state and is currently working with the Town of Bennington on two potential RHP projects.

Mike Cammock and I run River Valley Property Management, LLC

Good Afternoon Cindy,

My name is Mike Cammock and I run River Valley Property Management, LLC in Windsor, Vermont. I was just copied on an email relating to RHP funds for transitional housing programs in the State of Vermont.

I would be interested in talking with you more about what you are needing.

One of the properties we manage is a beautiful Vermont Inn that the owners are looking to stop operating as an Inn (mostly due to COVID-19). The primary goal has been to sell the property, but I would interested in finding out more about your program, as transitional housing could be a very productive use for this sort of property.

The property can be seen at www.snapdragoninn.com and is a beautiful heritage property. It is about 15 mins walk from Ascutney hospital (literally 2 mins drive).

I would be interested in finding out more about what you are needing in terms of transitional housing resources to see if this property could play a role.

Cheers,

ACCD Actions Taken or Comments

Referred Mike Cammock to VTARR and VFOR for additional action.

Tony Redington

Lila Bennett with Journey to Recovery Center in Newport

Reached out to us to discuss the need for Social Detox Housing in her area as well as the need for recovery housing.

ACCD Actions Taken or Comments

VCDP staff met with Lila to go over the Recovery Housing Program and coordinated a connection with VTARR and VFOR.

Second Amendment Comments

Jan Ohlsson

Asked by email Cindy, I was sent the draft of the recovery bed program to review....i did a quick read..and the one thing, I feel is missing, is a flow chart from the patient's point of view....

How does a person wanting to recover get into the program.? what I hear from a friend who works in Mental Health and reading on my part, the problem is also the patients are shunted from one place to another, cannot fill in the forms needed, etc. certainly there needs to be housing and services for recoverybut the system has to also work from the patient's perspective, and with ease.

ACCD Actions Taken or Comments

VCDP staff added a section labeled "Persons in Recovery" to provide details on how to access recovery residence beds.

Sally Fluery

A former landlord that provided statement challenges of renting to individuals in recovery that relapse.

ACCD Actions Taken or Comments

There is current legislation proposed to identify the gaps for recovery residences and services.

Will Eberle

Sent email of support for plan as written.

Partner Coordination

Since this was a new realm for DHCD, DHCD initially reached out to the Agency of Human Services (DSU formerly ADAP, DOC) and Downstreet to discuss their current programs and initiatives for transitional housing for persons that are recovering from substance use disorder.

VCDP staff also reached out to the Continuum of Care Program, Emergency Solutions program and HUD-VASH.

DHCD staff met with Vermont's affiliate of National Alliance for Recovery Residences (VTARR), Vermont Foundation on Recovery, Vermont CARES, to learn about their organization's and what their role is in recovery of substance use disorders.

DHCD staff met with the liaison from the Department of Health that coordinates the Governor's Substance Misuse Prevention and Oversight and Advisory Council (SMPC) to gain information on what that council is working on to assist with recovery of substance use disorders. The liaison for SMPC invited DHCD Staff to join the Intervention, Treatment, and Recovery Committee (ITR) monthly meetings that meets with SUD service providers, recovery residences providers, recovery advocacy groups, harm reduction programs, state agencies to look at the four priorities area identified by ITR as issues for

persons in recovery 1) Housing, 2) Transportation, 3) Employment and 4) Residential Treatment. ITR will also be discussing cross cutting issues for persons in recovery such as access, childcare, communication, connection, COVID 19 and Stigma to address each priority identified.

DHCD staff communicated with Vermont Housing and Conservation Board (VHCB) staff regarding the use of HOPWA funds and how that program population is impacted by SUD. Vermont receives HOPWA awards every three years. The last award was in 2020 and was for \$1.4 million for the period of March 1, 2021 – February 28, 2024. About \$475,000 of the funding is expended per year. Vermont's state-wide competitive HOPWA award is administered through 4 partner organizations: VSHA and three AIDS Service Organizations (ASO's) – Vermont CARES, AIDS Project of Southern Vermont, and HIV/HRC Resource Center. VSHA administers approximately 30 tenant-based vouchers for low-income people with AIDS/HIV. The ASO's deliver HOPWA services in 3 categories: 1) Emergency Assistance to remain appropriately housed, including payments for mortgage, rent or utilities; 2) Permanent Housing Placement – provides assistance to clients with first month's rent and security deposits to allow them to obtain housing; and 3) Supportive Services – providing housing and other counseling to clients to help them remain appropriately housed. Although it is an eligible activity, Vermont does not utilize our HOPWA grant for permanent supportive housing or other housing development.

DHCD considered resources provided by the Agency of Human Services (OEO, DOC, DSU formerly ADAP), Downstreet, Substance Abuse and Mental Health Services Administration (SAMSHA's), Vermont affiliate of National Alliance for Recovery Residences and H.783 Bill currently before Vermont's General Assembly.

Monitoring

RHP Action Plan must follow *State Bulletin #5 Policy for Grant Issuance and Monitoring* which incorporates the provisions of the new "Uniform Guidance" issued by OMB.

RHP will take a risk-based monitoring approach that is based on such factors as size of award; first time receiving an award; complexity of project; staff turnover; past performance; outstanding or delinquent reports from other Programs; and one or more audit findings/internal control issues regarding program performance or compliance.

All grantees are monitored on a regular basis in accordance with program specific guidelines, as well as state and federal regulations. Monitoring of all programs includes desk review of requisitions and supporting back-up documentation; review of program reports; and audit reports. RHP monitoring will also include onsite reviews to interview program and administrative staff; and conduct onsite construction inspections, or virtual monitoring will be conducted.

All grantees shall ensure adequate Subrecipient Oversight Monitoring per the Uniform Guidance using the Subgrantee Financial Monitoring Worksheet that will be an award condition. Only a Municipal staff person can complete and be responsible for the subrecipient monitoring. All Subrecipients will complete a Subgrantee Financial Monitoring Worksheet that complies with Subrecipient Monitoring per the Uniform Guidance and upload the documentation to the Agency's on-line grants management system (GEARS).

Pre-Award/Pre-Agreement Costs

Grants Management conducts a Pre-Award Eligibility Determination and Risk Assessments on a project prior to an award to ensure no award is made to an ineligible organization and to mitigate any high-risk awards through special conditions in grant agreements and monitoring and reporting.

RHP funds can only pay for pre-award/pre-agreement costs of a project providing the environmental release has been issued for the project.

The Agency has been tracking expenditures for pre-award costs back to December 2, 2020, which correlates to an estimate of \$700,000 in pre-award costs at the time of receipt of a Grant Agreement from HUD. \$7,002 of the cost is for general administration and environmental review. The Agency intends on funding \$692,760 from FY20 and \$7,240 from FY21 to the following two projects:

City of Barre – Barre Recovery Residence

\$500,000 of RHP funding will be granted to the City of Barre to be subgranted to Down Street Housing & Community Development for the purchase and rehabilitation of a historic building located at 31 Keith Ave, Barre, VT 05641. The building will be renovated into a transitional Recovery Housing residence that will serve women and women with families – many of whom have experienced domestic violence and are currently experiencing homelessness. The building will include 3 family units – two single person apartments and one group housing unit which can hold up to 4 families. There will be 6 direct beneficiaries at or below 50% AMI. Downstreet has partnered with Vermont Foundation of Recovery (VFOR) to staff and operate the program.

Town of Johnson - Jenna's Promise

\$200,000 in RHP funding will be granted to the Town of Johnson to be subgranted to Jenna's Promise LLC for the rehabilitation and revitalization of a vacant building in downtown Johnson to be turned into a coffee shop and supportive housing for people in recovery from substance use disorder. The project also includes \$300,000 of CDBG funding. The coffee shop will be located on the lower level of the building with the housing on the upper level. The project, Jenna's Sober Living, will run one building as essentially a Level I facility; it will be run with house rules and drug screening. Six bedrooms will house up to eight women in recovery, maintaining full occupancy of eight LMI individuals (women) over 5 years with turnover as needed. Income level projections are based on the likely income of those participating in recovery. Tenants will complete income surveys.

Pre-Award Costs for FY22

Town of Bennington – Squire Recovery Housing Project

\$500,000 in RHP funding will be granted to the Town of Bennington to be subgranted to Shires Housing for the rehabilitation of 185 North Street in Downtown Bennington, VT. The historic property known as "Squire House" will provide 3 units of recovery housing with 6 bedrooms dedicated to women and women with dependent children. Shires will act as developer through a limited partnership and maintain the property through a long-term master lease agreement with the Mission City Church and VFOR.

Town of Bennington – Gage Street

\$139,460 enhancement request is anticipated from the Town of Bennington to subgrant to Shires Housing for the rehabilitation of 612 Gage Street in Bennington, VT. The building will have two units with 9 total bedrooms dedicated to men in recovery, including one housing manager who will also be in recovery. Shires will own the property and act as property manager through the Limited Partnership. The building will be designed to meet the programmatic needs of the Turning Point Center as they enter into a long-term master lease with Shires. This grant originally requested \$500,000 but only received \$360,540 in RHP funds due to funding limitations at the time and bids have been received and additional funding is needed.

With only \$55,194 remaining and the cost of construction being so high, we will likely utilize the remaining funding as bids are finalized with one of the existing awards.

Pre-Award Costs for FY23

Town of Bennington – Gage Street

In June 2023 this project was awarded an additional \$500,000 to fill the funding gap due to increases construction costs. It received the remaining \$55,194 in FY22 and \$444,805 allocation out of FY23, bringing the project's total award to \$1 million.

Town of Essex -- VFOR Essex Recovery Housing

In November 2021 the Town received an award of \$360,540 in FY21 RHP funds to subgrant to Champlain Housing Trust (CHT) to acquire and renovate the property at 1005, 1006, 1007 Ethan Allen Avenue, Essex, VT 05452 to provide recovery housing in the Fort Ethan Allen neighborhood for individuals experiencing substance use disorder. This project will have 12 beds for men, 12 beds for women and 8 beds for men or women with children in recovery. In November 2023 this project was awarded an additional \$300,000 to fill the remaining funding gap due to increased construction costs. It received \$300,000 in FY23 funds bringing their total award to \$660,540.

Program Income

If any Program Income is generated by a program served with RHP funds, all the generated program income received must be returned to the municipality and the municipality must return the program income funds to ACCD. ACCD will transfer any program income generated from a RHP grant to another open RHP grant. If all other RHP grants are closed it will be part of ACCD's regular CDBG program income and will be subject to regular CDBG program rules. Revolving Loan Funds are prohibited.

HOUSING: A CRITICAL LINK TO RECOVERY

An Assessment of the Need for

RECOVERY RESIDENCES In Vermont

Prepared by John Ryan, Principal DEVELOPMENT CYCLES East Montpelier, VT

Prepared for

DOWNSTREET HOUSING & COMMUNITY DEVELOPMENT With Funding from the Vermont Housing & Conservation Board

February 2019

ACKNOWLEDGEMENTS

The author would like to express appreciation to all of those who helped make this assessment possible.

Thanks goes first to **Downstreet's** Executive Director Eileen Peltier for stepping up so fully to address a critical need in the state and to the **Vermont Housing & Conservation Board** for providing the funding for this Needs Assessment.

This report would not be possible without the insights and information provided by many individuals working day to day to support the recovery of Vermonters with substance use disorders. My gratitude to each of you. A special thanks goes to the staff of **Vermont's Alcohol & Drug Abuse Prevention programs** (ADAP) for the generosity of their time providing critical information to this study and for their ongoing efforts to support Vermonters whose challenges are the subject of this report.

The author would also like to acknowledge the **Governor's Opioid Coordination Council** for their tireless work identifying the challenges, gaps and opportunities of Vermont's system of prevention treatment and recovery. Their efforts to highlight the need for a system of long-term recovery placed a spotlight on the need for recovery housing in Vermont.

Thanks also goes to **NeighborWorks America** and the **Hoehl Family Foundation** for their financial support for this effort.

EXECUTIVE SUMMARY

Downstreet Housing & Community Development of Barre, VT engaged consultant John Ryan, Principal of Development Cycles in East Montpelier, VT to assess the statewide need for Recovery Residences (hereafter referred to as **RR**), a group housing approach to supporting Vermonters recovering from Substance Use Disorders (**SUDs**). The following summarizes key findings and recommendations from that assessment.

OVERALL ASSESSMENT

Vermont has a serious Substance Use Disorder problem affecting more than 52,000 residents, or one in 10 individuals over age 12. Only the District of Columbia has a higher concentration of substance use disorder.

The consultant estimates that roughly 1,200 individuals, or about 14% of the Vermonters entering treatment for an SUD in 2017, would benefit from access to a RR as a means of transition from a residential treatment facility or to support their recovery while in non-residential treatment.

Vermont's RR supply currently offers its form of transitional housing to just 2% of those leaving treatment each year. These 212 beds are disproportionately located in Burlington or Brattleboro. Several treatment hubs¹ have no RR option. Only one residence accommodates women with dependent children despite the fact that this sub-group represents a significant share of those in treatment.

Vermonters with SUDs and their families are among our most vulnerable neighbors. Though the disorder affects individuals at all income levels, those with SUDs are overwhelmingly poor. More than 3/4 of Vermonters in treatment today are Medicaid-eligible, placing nearly all of them in the category of Extremely Low Income. Housing instability represents one of the greatest external hurdles to a recovery that is already inherently difficult.

RECOMMENDATIONS

The consultant recommends that, provided certain conditions can be met, RR options in the state be increased, starting in those communities with the highest priority needs:

- Rutland City: one RR dedicated to men, and one dedicated to women and/or women with dependent children
- **St. Albans City:** one RR dedicated to men and one dedicated to women and/or women with dependent children
- **Barre/ Berlin (Montpelier):** one RR dedicated to women and/or women with dependent children

- <u>Burlington and/or South Burlington</u>: one RR dedicated to women with dependent children
- **St. Johnsbury:** One RR dedicated to women and/or women with dependent children.
- Morrisville: one RR dedicated to men

Randolph Orange County	211	0	134	0

SOURCE: ADAP and Development Cycles Survey of RRs, 2018.

Each of these priority hub communities has more than sufficient need to sustain the RRs recommended. Developing these priority RRs represent a substantial undertaking requiring a large commitment of money and human effort. These highest-priority projects also represent an opportunity to continue to test the efficacy and demand for units in this model before taking it to communities with lower overall levels of SUD Treatment.

Conditions for Success

These recommendations are predicated on the ability of the Vermont Alliance of Recovery Residences (VTARR) and the other key stakeholders to successfully address the challenges identified in the assessment, specifically, the need to:

- Strengthen the delivery of wrap-around services by strengthening the network of service providers that play a programmatic role with the RR and its residents.
- Develop these projects at a pace that ensures a strong, seasoned and well-trained supply of mentors, coaches, house managers and case managers to whatever degree these roles interact with the residents of these RRs.
- Stress the importance of building a sense of community, self-worthiness and belonging both within the RR and within the community as a whole.
- Find a sustainable funding mechanism to bridge the gap between the true operational cost of a well-functioning RR and the extremely limited capacity of most residents to cover that cost.
- Commit to investing in the community organizing and messaging aspects of the process in order to manage expectations and build the capacity and resilience needed to address the inevitable setbacks the RR's residents will face.
- Develop a clear and flexible set of strategies to significantly reduce the capital risk associated with acquiring or substantially renovating properties that may have limited market potential should their purpose as RRs need to change.

WHAT IS A RECOVERY RESIDENCE?

A Recovery Residence is a group home dedicated to supporting individuals to live independently in the early stages of their recovery from any type of Substance Use Disorder. The residences mix adult residents of all ages, but they typically house men, women, and women with dependent children separately. Most commonly, a RR is a single-family structure housing between 4 and 10 residents in some combination of separate and shared rooms. Small multi-family recovery apartment buildings are growing as a common approach outside of Vermont. Residents pay something for their housing and commit to not using alcohol or illicit drugs during their tenure. RRs may or may not limit the duration of occupancy, but most stays range between 5 and 12 months. Residents typically sign contracts rather than leases, affording the sponsoring entity greater capacity to, among other things, remove individuals who do not abide by the terms of their agreements.

The RR model is predicated on supported, peer-based accountability. It leverages the common intention of residents to overcome their addiction and reassemble their lives. This

assessment presumes that the residents will receive a range of non-residential supports, including an individual coach or mentor; an array of recovery services offered at nearby Recovery Centers; and medication-assisted treatment (MAT), when needed, as well as other services provided by nearby Treatment Centers. Live-in residential supervision is not an element of the RR model assessed, though some RRs in Vermont and many nationally do hire live-in "house managers" to support the group life and the recovery process of the residents.

THE SCALE OF NEED

Among the 50 states, Vermont has the 4th highest rate of alcohol dependence and the highest rate of illicit drug use disorder in the country. Of the estimated 52,000 Vermonters who suffer from some form of Substance Use Disorder, alcohol dependence accounts for roughly 2/3rds of all cases. In 2016-17, 7% fewer Vermonters age 12 and over reported an alcohol use disorder compared to 2010-2011. Illicit drug use disorders, on the other hand, increased by 13% during those six years. The data suggests that **between 80-90% of Vermonters with a SUD are not in treatment for their disorder.**

Treatment for heroin and other opioid use has increased exponentially among Vermonters since 2000. In 2000, there were only 399 Vermonters in treatment for use of heroin or other opioids. By 2017, that number had risen by 1,500% to 6,545. There are more Vermonters being treated for heroin or other opioids today than were treated for all forms of substance use disorder in 2000.

The number of Vermonters receiving treatment for all types of SUDs is up 77% from 2000. In 2017, there were 11,498 individuals involved in Substance Use Disorder treatment programs that receive funding from the VT Department of Health's Alcohol and Drug Abuse Programs (ADAP). In addition to these individuals, an unknown number of others are treated at hospitals, by private physicians, or private counselors not funded by ADAP.

Young adults are at particular risk. The rate of substance use disorder is greatest among Vermonters aged 18-25. Within this cohort, 22.7% have a substance use disorder, a level that is a startling 51% higher than the national rate for this age group. This cohort represents just over 10% of the state's population but accounts for a third of all of all SUDs and more than a third of all heroin and opioid use in the state. It is also a population underrepresented among those in treatment.

EX-2: Persons Receiving Treatment for Heroin or Other Opioids, Vermont, 2001 & 2017

The number of people being treated for heroin or other opioid use in **Vermont increased** 1,540% from 2000 to 2017

EXISTING RECOVERY RESIDENCES IN VERMONT

The consultant identified 22 residences in Vermont that have recovery from SUDs as their primary purpose and also function as independent living with only limited in-house staff support.³ These RRs offer a total of 212 beds representing about 2% of those currently in treatment for SUDs.

- ▶ 73% of these existing RR beds are reserved for men and 24% for women,³ despite the fact that women currently make up 42% of all Vermonters receiving treatment for SUDs.
- Only one RR provides housing for mothers with their dependent children although a large number of admits to treatment are women with dependent children, many of whom have lost custody of those children.
- ▶ 65% of the RR beds are located in Chittenden County though it makes up only 24% of the total persons receiving substance use disorder treatment statewide.
- Five hub communities—Rutland, Middlebury, Bennington, Newport, and Morrisville, whose service areas treat one-quarter of all those with SUDs in the state have no RRs.
- ► Three of these 22 RRs are either newly opened or under development, while at least two others have closed in the past year due to lack of funding or shifting use to meet other priorities.
- The residences experience relatively high levels of turnover, averaging more than two resident turnovers per year. They seldom function at full occupancy. Operators describe lack of funding, limited referral awareness, and the logistics of multiple transitions, rather than demand, as the cause of vacancies.
- Fewer than half of these residences have direct contracts with ADAP or the Department of Corrections that help underwrite their cost of operations.
- Operators were nearly unanimous in prioritizing women with dependent children as the population in greatest need of a RR option.

ESTIMATE OF THE GAP IN RECOVERY RESIDENCE NEED

The consultant estimates that roughly 1,200 individuals, or about 14% of the 8,498⁴ Vermonters entering treatment for an SUD in 2017, would benefit from access to a RR as a means of transition from a residential treatment facility or to support their recovery while in non-residential treatment. The consultant bases this estimate on a detailed breakdown of the housing status of new admits to treatment, as well as results from a 2017 survey of 84 service providers, and discussions with NARR, VTARR,⁵ and operators of Treatment Facilities, Treatment Centers, and Recovery Centers in Vermont. Key drivers for this need include:

- ► Homelessness: According to 2017 ADAP Housing Status data, over 900 individuals report their housing status as homeless at the start of treatment for SUDs. Additionally, facility operators report that hundreds of others spend part of their time in residential treatment facilities or hospitals largely because they have nowhere else to live. According to the ADAP data, the number of homeless individuals in treatment has risen four-fold since 2000.
- Inability to Pay for Housing: More than three-quarters of those in state-funded SUD Treatment Facilities qualify to have Medicaid cover the cost of that treatment. For most individual persons in Vermont, the income limit for Medicaid eligibility is \$16,764, a number that qualifies them as Extremely Low Income (<30% of Area Median Income or AMI). For Medicaid recipients at any household size, the income limits would qualify them as below 50% of AMI. These represent the income levels where housing is most insecure, where cost burdens are greatest, and where the ability to find affordable housing options are most constrained. These roughly 8,000 Medicaid-eligible individuals in treatment constitute between 20% and 30% of all the Extremely Low Income Households in the state.
- Insecure Housing as an Impediment to Recovery: The following comes from a report summarizing an October 2017 survey conducted by the Governor's Opioid Coordination Council and responded to by 84 treatment providers in Vermont:

"For 75% of respondents from across the state, housing issues and stressors are complicating (and potentially undermining) treatment and recovery progress in at least 1/3 of their cases—and for most of those respondents, between 66% and 100% of their clients are dealing with a housing situation that they think is interfering with the client's recovery."

28% of these respondents identified the need for RRs as the biggest gap in housing services available to their clients, while nearly half described housing affordability as the greatest challenge.

Currently, there are about 212 recovery-residence beds in Vermont, with a total potential to serve roughly 425 residents a year staying an average of six months. These beds are not distributed geographically, or in terms of sex or the presence of dependent children, to optimally serve those who need it. The consultant estimates that at least 1,200 Vermonters annually enter SUD Treatment who would meet all three of the following criteria: 1) they are at the appropriate level of recovery to be successful in the RR model;⁷ 2) their alternative housing options would undermine their recovery efforts; and 3) they would choose to take up the RR option if it was located within their treatment hub, they knew about it, and it was affordable to them. To serve this population sustainably would require as many as 300 additional beds distributed statewide. The population with the greatest unmet need is women with dependent children.

AVAILABILITY OF APPROPRIATE HOUSING IN HUB COMMUNITIES

The treatment hubs are located in the same communities that serve as the primary focus of affordable housing efforts in Vermont. For the most part, established nonprofit housing organizations base their operations in these same communities. Outside of Chittenden County, the Recovery Centers and Treatment Centers are located in neighborhoods with home values, rents, and household incomes that are often well below the statewide median. All 12 communities assessed have a stock of at least 200 large single-family homes (4+ bedrooms) or small multifamily properties (2-4 units) that is within easy access of the existing treatment and recovery centers. Most have more than 500 appropriately sized properties for rent or acquisition. Ample stock combined with low acquisition prices and market rents in most of these target communities represents an opportunity to scale the RR model quickly. This advantage is balanced by the challenge of ensuring that these properties have enough value to cover acquisition and/ or renovation costs if their use changes.

CHALLENGES

Despite the scale of demand for RRs, the concept needs to effectively address several substantial challenges, including the following:

- The effort will need to significantly strengthen the network providing non-residential services to the RR residents, in order to, among other things, increase the effectiveness of the residence as a stabilizing influence; build social capacity and integration; and improve the readiness assessment and referral process. The importance of building a sense of community, self-worthiness and belonging both within the residence and within the community as a whole is paramount. Addressing this challenge effectively will require increasing the capacity of some of Vermont's existing Treatment Centers and Recovery Centers, especially in their provision of psycho-social and life-skills services.
- Scaling RRs within a peer-support model will require expanding the number of coaches, mentors, residence managers, and in some cases caseworkers, from among those who are themselves in recovery. Some service providers expressed concern that the opioid crisis was already promoting individuals too quickly from being in recovery to helping others in recovery, thus placing a great deal of stress and responsibility on individuals who were themselves vulnerable. A thoughtful process of vetting, training and seasoning those working in this space needs to go hand in hand with funding for the service elements needed for a sustainably successful RR model.
- Managing the community's expectations represents another major challenge. The problem these RRs are helping address is daunting. They will primarily serve residents with opioid addictions that carry an extraordinarily high relapse rate and potentially catastrophic consequences with each use. Despite the universal nature of addiction,

the reality is that those in greatest need for these RRs are predominantly young and extremely low income individuals, with low levels of employment, and relatively high levels of prior homelessness and co-occurring mental health issues. These residences will be located primarily in communities and neighborhoods where the incidence of drug and alcohol use and dependence are highest. It would be tragically naïve to imagine that these homes will not experience serious setbacks, including incidents of violence, drug dealing, overdose deaths, and adverse interactions with neighbors. Nothing will be more important to success in scaling the RR concept in Vermont than the commitment by stakeholders to building realistic expectations, resilience to setbacks, and long-term support for addressing these daunting challenges among those providing financial and community leadership.

- The concept that residents pay something to live in a RR is pretty much universally applied. At the same time, residents seldom have the capacity to cover the true costs needed to acquire (or rent), renovate, furnish, and maintain a home, much less pay for the in-house services required. The consultant estimates that less than 30% of all Vermonters receiving treatment for SUDs can afford to pay more than \$100/week for housing during their tenure in a RR. Many will be unable to pay anything for the first few months of residency. Finding sustainable sources of revenue to bridge the gap between resident contributions and true costs will be critical.
- A RR is special needs housing that will be located, with few exceptions, in areas of Vermont where the demand for large single-family homes is weakest. Siting these residences will require even more sensitivity to its immediate surroundings than does traditional affordable rental housing, for it needs to balance convenience to treatment, buffer residents from negative community influences, and have the capacity to build a welcoming response from abutters and neighbors. That will be no small task. Even with a well-sited property, the RR provider looking to acquire or substantially renovate such a home may face a serious challenge demonstrating that those costs can be recouped if the property stops functioning as a RR. Some combination of the following strategies may be needed to address this challenge effectively:
 - Leasing rather than owning the RR
 - Fundraising rather than borrowing for acquisition and/or rehabilitation costs
 - Repurposing homes that are already in the non-profit housing or special needs housing portfolio
 - Negotiating long-term service contracts and operating subsidy commitments as a pre-condition to acquisition
 - Selecting only those single-family properties that have viable adaptive reuse potential as small multi-family rentals
 - Modifying the RR model to allow for the RR to have separate apartments within existing 2-4 family buildings
 - Attaching project-based rental assistance that can transfer to a change of use if needed
 - Funding a loss-reserve pool or loan guarantee program available to the portfolio of VTARR certified properties.

NOTES

- 1 Hub and Spoke is Vermont's system of Medication Assisted Treatment, supporting people in recovery from opioid use disorder. Communities with Regional hubs offer daily support for patients with complex addictions. At over 75 local Spokes, doctors, nurses, and counselors offer ongoing opioid use disorder treatment fully integrated with general healthcare and wellness services.
- 2 The 7-unit Springfield RR is open to men and women equally.
- Wermonters with SUDs may access supportive or transitional housing whose primary function is other the recovery from substance use. These may include homes for veterans, for the homeless, for those previously incarcerated, or for those with physical or mental health disabilities. Vermonters with SUDs may also reside in residential facilities that have more restrictive freedom of movement and provide greater levels of on-site supervision than what is allowed and provided for in the RR model being assessed here.
- 4 8,498 represents the number of Vermonters who entered treatment in 2017 regardless of whether that was the first time they were receiving treatment; 10,498 represents the total number of people being treated; the difference is the number whose treatment spanned more than one year.
- 5 The 2017 Vermont State Housing Authority's "Annual Point in Time Statewide Count of the Homeless" counted a smaller number—228 of the 1,225 (19%)—of homeless persons in Vermont as describing themselves with an SUD.
- Wermont Alliance of Recovery Residencies (VTARR): VTARR is a coalition of people and organizations from the recovery community focused on improving the RR landscape throughout Vermont. VTARR's mission is to support persons in recovery from addiction by improving their access to quality RRs through standards, support services, placement, education, research and advocacy. RRs that gain voluntary certification adopt a base standard of quality that positively impacts their members and communities. VTARR is an affiliate of NARR, the National Alliance of RRs.
- 7 Not everyone in treatment for a SUD needs a RR nor is everyone in treatment at the right stage of recovery to make good us of the option if they had it. The National Association for RRs (NARR) has identified four stages of RR, each based on the level of supervision and independence appropriate to the individual's wellbeing (see Appendix B for more information). The Recovery Residence model assessed in this study is only for residents in Recovery Level I and Level II.

I. INTRODUCTION

1. Purpose of Study

The purpose of this assessment is to provide a detailed and thoughtful estimate of the number of Vermonters whose recovery from Substance Use Disorder (SUD) relies upon the availability of transitional group housing, specifically Recovery Residences (hereafter referred to as RR) located near to existing Recovery Centers and Treatment Centers in Vermont's designated Hub communities.

2. Scope of Work

The assessment includes the following elements:

- Provides information on the scale, trends and demographics of substance use and substance use disorder in Vermont
- Provides information on the scale, trends and demographics of Vermonters receiving treatment for SUDs
- Assesses the adequacy of currently available residences to support Vermonters in recovery from SUDs
- Assesses the availability and appropriateness of the housing stock in neighborhoods near existing Recovery Centers and Treatment Centers in Vermont's designated 12 hub communities
- Identifies keys to success and critical challenges to RRs both in Vermont and elsewhere in the United States
- Projects the need for additional RRs in Vermont to serve the needs of three distinct sub-groups of Vermonters in recovery: men, women, and women with dependent children
- Prioritizes the level of need within the network of hub communities.

3. Methodology

In order to complete this Scope of Work the consultant utilized a wide range of sources, including:

► The US Substance Abuse & Mental Health Services Administration (SAMHSA), Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health

(NSDUH) for current and historical prevalence estimates of Vermonters and Americans both who use alcohol as well as prescription and illicit drugs and develop SUDs

- ► The Alcohol and Drug Abuse Programs (ADAP) of the VT Department of Health for a wide array of data on Vermonters receiving treatment for SUDs in state-funded programs
- ► The US Census Bureau's 2017 Five Year American Community Survey for census tract level housing, rents, and household income data
- Zillow.com for current listings of large single-family homes and small multi-family properties for sale in target areas of hub communities
- Google Maps to identify the location of recovery and treatment Centers, transportation hubs, and supermarkets in the target areas of hub communities
- Additionally, the consultant spoke with more than 25 subject experts including officials at ADAP and SAMHSA; operators or staff at Treatment Programs, Treatment Centers, Recovery Center and RRs in Vermont; and RR experts at or referred by the Vermont Association of RRs (VTARR) and the National Association of Recovery Residences (NARR). Appendix A lists those individuals interviewed.

4. Certifications & Limitations

John J. Ryan, Principal of Development Cycles located in East Montpelier, VT prepared this assessment and certifies that the recommendations and conclusions of this study are based solely on his professional opinion and best efforts. The study has a number of key limitations to consider when reviewing the findings and recommendations provided:

- Much of the data presented here for those who use alcohol and other illicit drugs come from annual surveys performed by SAMSHA. SAMSHA reports their estimates with a mid-level estimate as well as a range of high and low estimates that have at least a 95% confidence level based on the sample size. For clarity sake, the consultant reported only the mid-level estimate. It should be understood that, depending on the sub-group being detailed, the range between high and low estimate might be 50% or more. In general, it is best to think of these numbers in terms of scale. It certainly makes a difference if there are 4,000 or 15,000 young heroin users in the state, but the 7,750 number reported conveys a scale of use that puts the 212 beds of RRs into a meaningful context regardless of whether the reality is at the top or the bottom of that range.
- The information provided by ADAP for Vermonters in treatment for SUDs comes from direct unduplicated counts of recipients in state-funded programs. This clearly understates the total number of treatment recipients, for it does not include those treated in hospitals, and by private physicians and counselors not receiving funding

by ADAP. There was no reliable way to estimate how many more people might be in recovery but are not counted by the ADAP totals. For that reason, this assessment is based solely on the scale and demographics of those in state-funded treatment programs and should be seen as a conservative estimate of the real total need.

The information, estimates, and opinions contained in this report were derived from sources considered reliable. The consultant assumes the possibility of inaccuracy of individual items and for that reason relied upon no single piece of information to the exclusion of other data, and analyzed all information within a framework of common knowledge and experienced judgment.

5. Introducing the Recovery Residences Concept

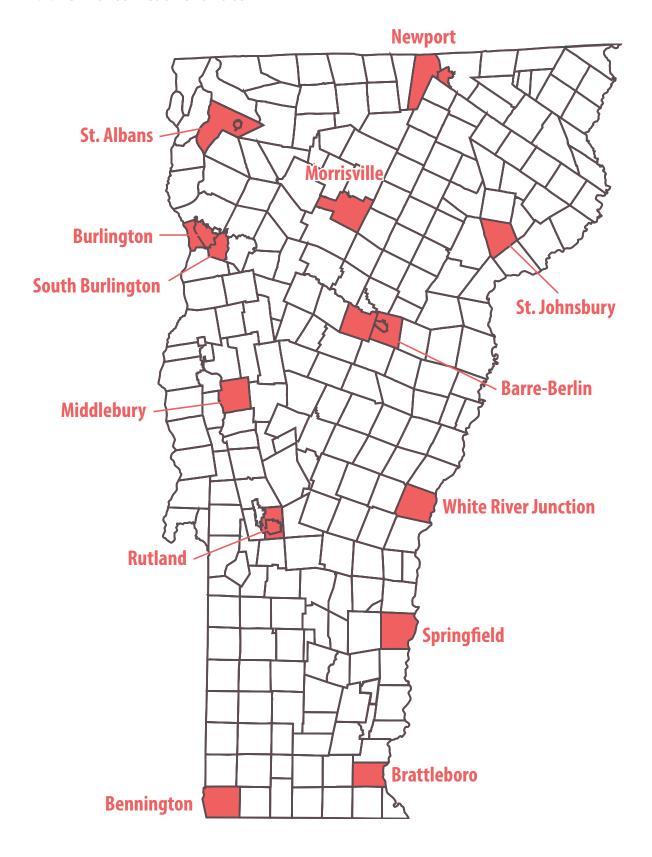

A Recovery Residence is a group home dedicated to supporting individuals to live independently in the early stages of their recovery from a Substance Use Disorder. This assessment presumes that any new RRs will be created within relatively easy access to the existing network of Treatment Centers and Recovery Centers located in the 12 designated hub communities:

- 1. Barre-Berlin
- 2. Bennington
- 3. Brattleboro
- 4. Burlington
- 5. Middlebury
- 6. Morrisville
- 7. Newport
- 8. Rutland
- 9. St. Albans
- 10. St. Johnsbury
- 11. South Burlington
- 12. Springfield

The RR model houses, without distinction, those whose disorder stems from alcohol, opioid, marijuana, or other kinds of substance use. The residence houses adults of all ages, but they typically house men, women, and women with dependent children separately. Most commonly, a RR is a single-family structure housing between 4 and 10 residents in some combination of separate and shared rooms. Residents pay something for their housing and commit to not using alcohol or illicit drugs during their tenure. RRs may or may not limit the duration of occupancy, but most stays range between 5 and 12 months. Residents typically sign contracts rather than leases, affording the sponsoring entity greater capacity to, among other things, remove individuals who do not abide by the terms of their agreements.

The RR model is predicated on supported, peer-based accountability. It leverages the common intention of residents to overcome their addiction and reassemble their lives. This assessment presumes that the residents will receive a range of non-residential supports,

I.1: Vermont's Treatment Hubs

including an individual coach or mentor; an array of recovery services offered at nearby Recovery Centers; and Medication-assisted treatment (MAT), when medically necessary, as well as other services provided by nearby Treatment Centers. Live-in residential supervision is <u>not</u> an element of the RRs model assessed, though some RRs in Vermont and many nationally do hire "house managers" to support the group life and the recovery process of the residents. Appendix B provides more details about the RR model.

II. ESTIMATING THE SCALE OF RECOVERY RESIDENCES NEED IN VERMONT

The following section looks at several underlying indicators of need for residences to assist Vermonters recovering from Substance Use Disorders (SUDs). These indicators include: alcohol and illicit drug use; substance use disorders; untreated SUDs; those in treatment for SUDs; and housing status and income level of those in treatment. The evaluation presents this information by age, by sex, by the presence of children, and by county wherever information is available at this level of detail and is important to understanding the scale of need.

1. Use Rates for Alcohol and Illicit Drugs

Vermont has one of the highest alcohol, marijuana and other illicit drug usage rates in the country. This is significant because use predicts use disorder, which is at the source of the need for RR development. For nearly every substance and age cohort measured, Vermont's usage rate exceeds the national average and is among the 10 highest rates of use.

II.1: Substance Use Rates By Substance, Vermont, 2016-17

		% of Population Who Use In:		Vermont's % of
Substance Use Interval	Vermont	US	National Average	
Alcohol	Past month	62.0%	51.0%	121%
All Illicit Drugs	Past month	19.4%	10.9%	178%
Marijuana	Past month	18.6%	9.3%	203%
Opioid Misuse	Past year	5.2%	4.6%	113%
Pain Reliever Misuse	Past year	0.4%	0.4%	101%
Cocaine	Past year	3.5%	2.0%	173%
Methamphetamine	Past year	0.5%	0.6%	191%

SOURCE: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2016 and 2017.

To give a sense of scale, based on the SAMSHA survey, roughly 25,000 Vermonters used heroin or other opioids in the past year. Of these, an estimated 7,750¹ were 18 to 25 years. Though this age cohort represents only 13% of Vermonters age 12 and over, they constitute 30% of all Vermonters who used opioids in the previous year.

2. Substance Use Disorders (SUDs)

According to SAMSHA's 2016-2017, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 9.64% of Vermonters age 12 and over suffer from some form of Substance Use Disorder.² That represents more than 52,000 people in the state.

II.2: Substance Use Disorder Among Persons 12 Years & Older, Vermont, 2010-2011 & 2016-2017, By Alcohol & Illicit Drug Dependence

Primary Source of	Percentage		Number	
Disorder	2010-2011	2016-2017	2010-2011	2016-2017
Alcohol	7.8%	7.3%	42,205	39,285
Illicit Drugs	3.4%	3.8%	18,034	20,346
Primary Source of	Rank Among States		Percent of National Average	
Disorder	2010-2011	2016-2017	2010-2011	2016-2017
Alcohol	19	4	116%	133%
Illicit Drugs	2	1	125%	136%

SOURCE: FY 2010-2011 and FY 2016-2017 NSDUH State Prevalence Estimates; ranking does not include the District of Columbia.

Overall, Vermont is tied with Massachusetts as the state with highest rate of SUD in the United States. At 9.64%, Vermont's SUD rate is 31% higher than the national average.

Substance use disorder is greatest among Vermonters aged 18-25, for which it leads the nation by a considerable margin. Within this cohort, 22.65% have a substance use disorder, a level that is a startling 51% higher than the national rate. This cohort alone represents an estimated 16,708 individuals or 32% of all SUDs in the state. Less than 10% of that total currently receives treatment for their condition.

II.3: Substance Use Disorder Among Persons 12 Years & OLDER, Vermont, 2010-2011 & 2016-2017, By Age

2010 2017, by Age					
Ago Group	Percentage		Number		
Age Group	2010-2011	2016-2017	2010-2011	2016-2017	
12 to 17	9.0%	5.5%	3,764	1,983	
18 to 25	25.2%	22.7%	18,121	16,708	
26 & Older	7.4%	7.8%	31,301	33,582	
Total 12 & Over	10.0%	9.6%	53,618	52,164	
Ama Cuaun	Rank Among States		Percent of National Average		
Age Group	2010-2011	2016-2017	2010-2011	2016-2017	
12 to 17	2	5	127%	132%	
18 to 25	1	1	131%	151%	
				42.40/	
26 & Older	10	7	111%	124%	

SOURCE: FY 2010-2011 and FY 2016-2017 NSDUH State Prevalence Estimates; ranking does not include the District of Columbia.

Alcohol use constitutes roughly two-thirds of all SUDs in Vermont, with illicit drug use constituting the other one-third. This is consistent with national data.

Neither SAMSHA nor ADAP track substance use disorders by sex or by the presence of dependent children at the state level. Nationally, however, 12% of dependent children under age 18 live with at least one parent with an SUD. Vermont has a 31% higher rate of SUD than the national average. This suggests that somewhere between 14,000-18,000 children in Vermont are growing up in a household with some form of SUD.

The Department of Children and Families reported that in 2016, Vermont had 1,302 children in custody. Of the 266 children ages 0-5, over half (53%) were in custody due to opioid use within their household.

3. Persons Needing But Not Receiving Treatment

According to the SAMSHA estimates, 91% of Vermonters with a SUD are not currently receiving that treatment. For young adults (18-25) only about 5% report being in treatment for their SUD. The SAMSHA estimates do not correspond to the number of Vermonters who are actually receiving treatment. In order for there to be 11,498 Vermonters receiving SUD Treatment (this is ADAP's most recent count for 2017) either the number of Vermonters with SUDs is much higher than the SAMSHA estimates or the percentage not receiving treatment would need to be lower. As a result of this discrepancy, the consultant estimates that somewhere between 80-90% of those with a SUD in the state are not receiving treatment for the disorder.

II.4: Persons Needing But Not Receiving Treatment For A Substance Use Disorder, Vermont, 2010-11 & 2016-17, By Age

Ama Cuaun	Percentage		Number	
Age Group	2010-2011	2016-2017	2010-2011	2016-2017
12 to 17	8.2%	4.9%	3,442	1,766
18 to 25	23.1%	21.5%	16,613	15,853
26 & Older	6.5%	6.9%	27,734	29,788
Total 12 & Over	8.9%	8.8%	47,858	47,348
Ana Craun	Rank Among States		Percent of National Average	
Age Group	2010-2011	2016-2017	2010-2011	2016-2017
12 to 17	3	8	123%	125%
18 to 25	1	1	128%	153%
26 & Older	18	11	107%	116%
Total 12 & Over	8	1	114%	128%

SOURCE: 2010-2011 and 2016-2017 NSDUH State Prevalence Estimates

Despite the increased access to treatment and the dramatic increase in those in treatment in Vermont, the SAMSHA data suggests that Vermont is falling further behind other states in its effort to treat those with SUDs.

4. Trends in Substance Use Disorders

According to SAMSHA data, since 2010-2011 Vermont's overall level of SUDs has dropped by 2.7%. Underlying this relatively small change, are larger shifts in SUDs among cohorts that suggest demographics and public health response both play a role in the overall decline. The number of 12-17 year-olds reporting SUDs in 2016-17 was only about half the number who did so in 2010-11, representing a decline three times sharper than the decline in children this age. Clearly efforts to reduce SUDs for this youngest population are having an impact. The number of 18-25 year-olds with a SUD dropped by 7.4%, even as that population grew slightly. At the same time, SUDs among the much larger cohort of those 26 years and over increased by 7.3% in six years.

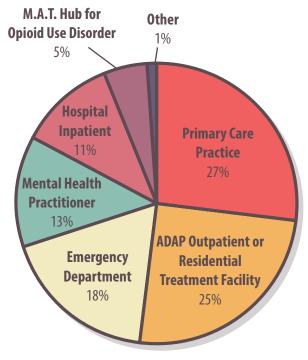

ADAP looks to patterns of use and attitudes toward use, especially among young people 12-17, as a means of looking at future trends in SUD. The range of data ADAP provided for this study (see Appendix C) suggest that while there may be some positive signs, especially regarding attitudes regard the risks of heroin and other opioid use, most of the indicators are pointing toward greater use and are not suggesting lower rates of SUD going forward. The overall impression left by these numbers is that while the particular substance of use may vary, the overall number of Vermonters who will suffer from a Substance Use Disorder is not trending downward. This is a view almost acknowledged by many of the professionals interviewed for this study.

Even where overall SUD rates have declined, as in the case of alcohol dependence, the rate of decline in Vermont is considerably lower than change experienced by the country as a whole. In 2010-2011, Vermont ranked 18th among the 50 states for alcohol dependence. Six years later, alcohol dependence in Vermont fell by 7.4% but it was now ranked as the state with the 4th highest level of alcohol SUD.³

5. Referral to Treatment

Individuals may be identified as potentially needing SUD treatment in many different places. In 2015, people were initially identified with a potential substance use disorder in the following locations:

II.5: Where The Need For Treatment Gets Identified, Vermont, 2015

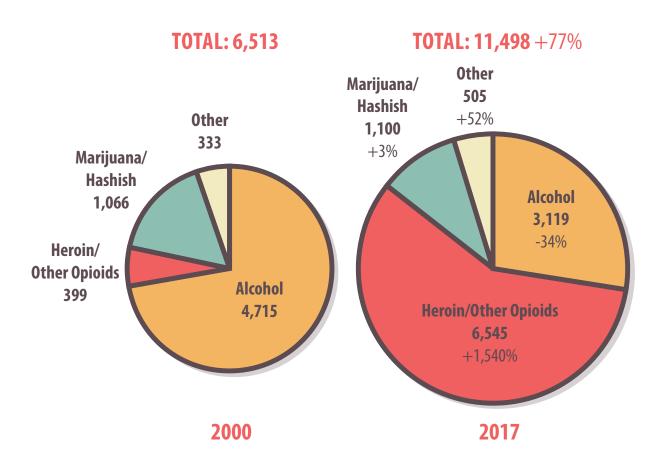

SOURCE: VDOH Alcohol & Other Drug Use Scorecard, 2015

6. Vermonters Currently Receiving Treatment for SUDs

In 2017, there were a total of 11,498 Vermonters receiving treatment for a substance use disorder. That number has increased by 77% since 2000. At the turn of the millennium, alcohol treatment accounted for 72% of all those receiving treatment and heroin and other opioids just 6%. By 2017, heroin/opioids represented 58% of all those treated, while alcoholism accounted for just 28% of the total.

II.6: Persons Receiving Treatment By Primary Substance, Vermont, 2000-01 & 2016-17

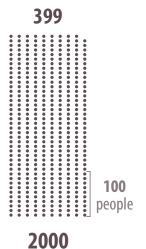

SOURCE: ADAP, Vermonter in SUD Treatment in ADAP Funded Programs, 2000-2017. Note: ADAP recently updated Total numbers for 2017 but Substance numbers have not been updated. Consequently, Substances in 2017 pie chart will not sum to Total.

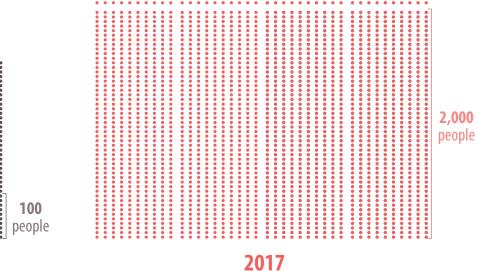

In raw numbers, there were 399 individuals receiving treatment with heroin and other opioids as their primary substance in 2000; by 2017 that number has increased to 6,545.

The number of people being treated for heroin or other opioid use in Vermont increased 1,540% from 2000 to 2017

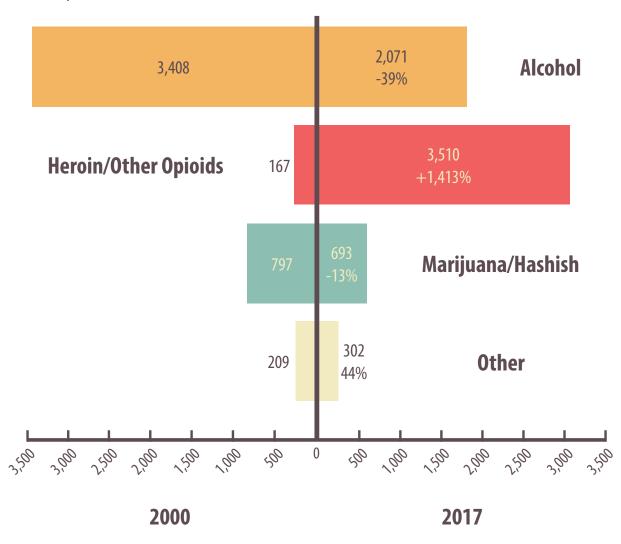

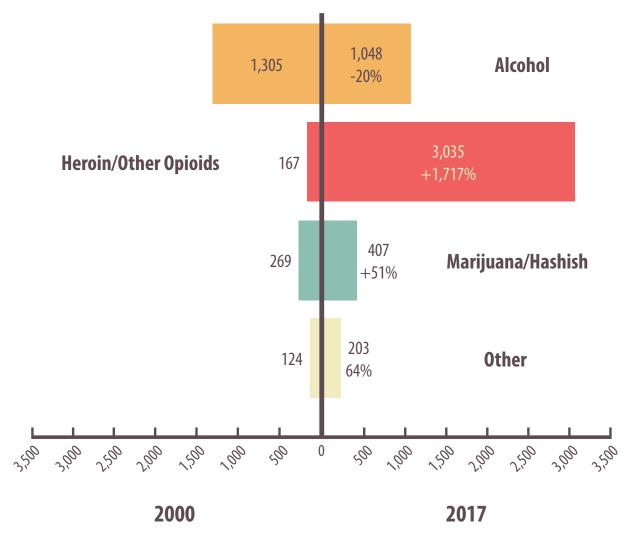

Figures II.8 and II.9 show the increase from 2000 to 2017 by the primary substance for those in treatment by the sex of the patient. It shows men are twice as likely to be in treatment for an alcohol-related disorder than women but only slightly more likely to be in treatment for heroin or other opioid use. Those seeking treatment for alcohol-related disorders has dropped by 20% for women and nearly twice that rate for men since 2000. Treatment for Heroin and Opioid use increased 14-fold for men and 17-fold for women during that period. Treatment Center respondents note that the rapid decline in those being treated for alcoholism was not an indicator of lower rates of alcohol dependence but actually represented a gap in services as the state tries to get a handle on the explosion in heroin use.

II.8: Men Receiving Treatment For Substance Use Disorder By Primary Substance, Vermont, 2000 & 2017

SOURCE: ADAP

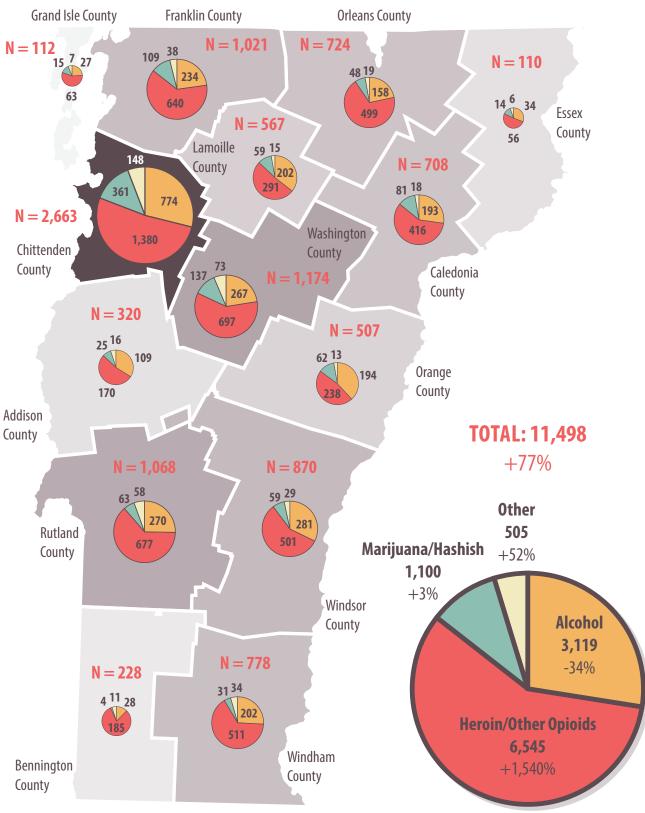

II.9: Women Receiving Treatment For Substance Use Disorder By Primary Substance, Vermont, 2000 & 2017

SOURCE: ADAP

Vermonters receive treatment all over the state. Figure II.10 looks at that distribution for 2017 at the county level.

II.10: Persons Receiving Treatment For Substance Use Disorder By Primary Substance, Vermont Counties, 2017

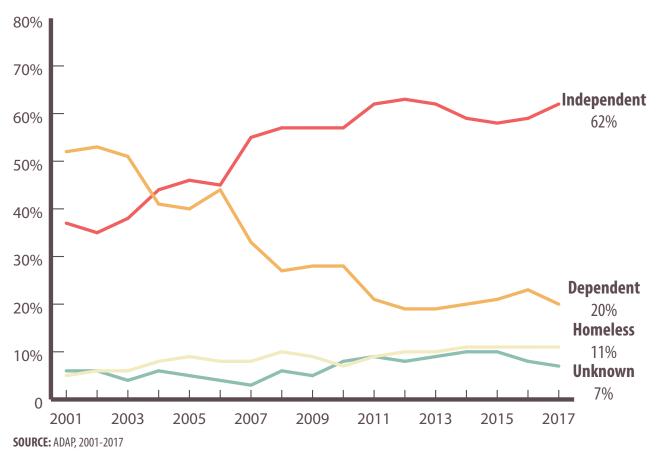

SOURCE: ADAP, Vermonter in SUD Treatment in ADAP Funded Programs, 2000-2017. Note: ADAP recently updated Total numbers for 2017 but Substance numbers have not been updated. Consequently, Substances in 2017 pie chart will not sum to Total.

7. Housing Status of Those Receiving Treatment

ADAP collects information on the housing status of those receiving treatment for SUDs upon their admission and discharge from treatment. In 2017, the following represents the status of all those in treatment at the time they began treatment.

II.11: Housing Status Of Vermonters In Treatment For SUDs By Status At Admission To Treatment, Vermont, 2001- 2017

In 2017, 64% of women and 60% of men lived independently at their time of admission. Eleven percent of both sexes experienced homelessness. While Vermonters with each housing status may have a need for RRs, the greatest need for housing belongs to those who are in the *Homeless* and the *Dependent-Living in a Supervised Setting* categories. The homeless need is obvious; the dependent need may be less so. Facility operators report that at any given time a significant share of those whose status is *Dependent-Living in a Supervised Setting* spend part of their time in residential facilities largely because they have nowhere else to live.

II.12: Homelessness By Primary Substance At Time Of Admission To Treatment, Vermont, 2001-2017

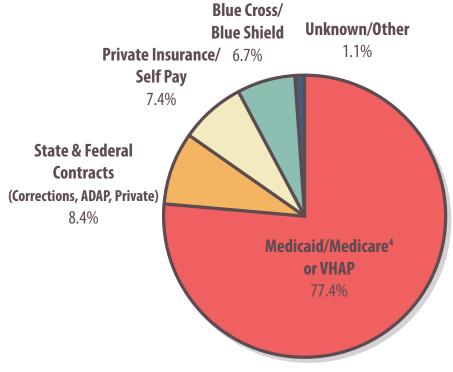

SOURCE: ADAP, 2001-2017

According to 2017 ADAP Housing Status data, over 900 individuals reported their housing status as homeless³ at the start of treatment for SUDs. The number of homeless individuals in treatment has risen four-fold since 2001. Over that time, the number of homeless women increased from 61 to 352 and homeless men increased from 169 to 552. The percent of patients who report homelessness at admission does not vary by alcohol, opiates or other drug.4

8. Capacity to Afford Housing

According to ADAP, the vast majority of those receiving treatment in the ADAP system rely on Medicaid to cover the cost of treatment. For most individual persons in Vermont, the income limit for Medicaid eligibility is \$16,764, a number that qualifies them as Extremely Low Income (<30% of Area Median Income or AMI). For Medicaid recipients at any household size, the income limits would qualify them as below 50% of AMI. These represent the income levels where housing is most insecure, where cost burdens are greatest, and where the need for affordable housing options are most constrained. These roughly 8,000 Medicaid-eligible individuals in treatment constitute a significant share of the poorest households in the state.

II.13: Source of Payment For Persons In Treatment For SUDs, Vermont, 2001-2017

SOURCE: ADAP, 2017.

No reliable information exists concerning the employment status of Vermonters receiving treatment for SUDS, but the 2017 Annual Report of the Vermont Recovery Network indicates that at first intake, only 33% of those utilizing the Recovery Centers are employed. This underscores the limited capacity of potential RR occupants to cover the true cost of living in the home. The consultant estimates that less than 30% of all Vermonters receiving treatment for SUDs can afford to pay more than \$100/ week for housing during their tenure in a RR.

9. Housing as an Impediment to Recovery

The following comes from a report summarizing an October 2017 survey conducted by the Governor's Opioid Coordination Council and responded to by 84 treatment providers in Vermont:

"For 75% of respondents from across the state, housing issues and stressors are complicating (and potentially undermining) treatment and recovery progress in at least 1/3 of their cases—and for most of those respondents, between 66% and 100% of their clients are dealing with a housing situation that they think is interfering with the client's recovery."

Twenty-eight percent of these respondents identified the need for RRs as the biggest gap in housing services available to their clients, while nearly half described affordability as the greatest challenge.

10. Readiness for Residence in a Recovery Residence

Not everyone in treatment for a SUD needs a RR to support their recovery efforts. As importantly, not everyone in treatment is at the right stage of recovery to make good use of the RR option if they had it. The National Association for Recovery Residences (NARR) has identified four stages of RR, each based on the level of supervision and independence appropriate to the individual's wellbeing (see Appendix B for more information). The RR model assessed in this study is only for residents in Recovery Level I and Level II. In the absence of hard data on the RR level of those in treatment for SUDs, the consultant asked 15 operators of RRs, Treatment Centers and Recovery Centers, as well as officials from NARR and VTARR for their estimates of the percentage of clients they see who would be appropriate candidates for a Level I or Level II transitional residence. Based on their response, the consultant estimates that that the percentage varies from as little as 33% among those currently homeless to 75% of those living independently at the time of their admission to treatment. Overall, the consultant estimates that between 55-60% of those currently in treatment would qualify as being appropriately housed at NARR's Level I or II (see Appendix C).

NOTES

- 1 Given the sample size for the SAMSHA survey, there is a 95% confidence level that ranges from a low of 4,000 to a high of 15,000 with 7,750 as the most likely estimate.
- 2 Substance Use Disorder is defined as meeting criteria for illicit drug or alcohol dependence or abuse. based on definitions found in the 4th edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV).
- 3 Vermont has consistently been among the states with the highest level of SUD in all of the SAMSHA estimates reviewed, limiting the likelihood that the state's poor rankings are a result of small sample sizes.
- 4 The 2017 Vermont State Housing Authority's Annual Point in Time Statewide Count of the Homeless counted a smaller, though still substantial, 228 of the 1,225 (19%) homeless persons in Vermont as describing themselves with an SUD.

III. EXISTING RECOVERY RESIDENCES IN VERMONT

Vermonters with SUDs may access supportive or transitional housing whose primary function is other the recovery from substance use. These may include homes for veterans, for the homeless, for those previously incarcerated, or for those with physical or mental health disabilities. Vermonters with SUDs may also reside in residential treatment facilities that have more restrictive freedom of movement and on-site supervision than what is allowed and provided in the RR model. At the moment, there is no universally established definition of a RR, nor is there any licensing or accreditation requirement specific to this type of housing. This assessment focused on identifying those homes in the state (whether they were called recovery, sober, ¾-way, or transitional residence), if: 1) their **primary** purpose is to assist residents in their recovery from Substance Use Disorder, and 2) if they offer high degrees of independence with only limited in-residence staffing, thus distinguishing them from Level III and Level IV residences.

Using this screen, the consultant identified 22 residences in the state totaling 212 beds that could be called Recovery Residences. Sixteen of these residences have a capacity of between 4 and 12 residents, totaling 73 men and 42 women. Seven beds are co-ed. The five Phoenix Houses around he state generally have a larger occupancy capacity (16-26 beds in 5-12 rooms in four of their five residences). They provide residences to 82 men and 8 women.

In all, 73% of existing recovery home beds are reserved for men and 24% for women, though women currently make up 42% of all Vermonters receiving treatment for SUDs. More strikingly, only one RR provides housing for mothers with their dependent children although a large number of new admits to treatment are women with dependent children, many of whom have lost custody of those children. It is also worth noting that 65% of the RRs and total beds are located in Chittenden County. Though Chittenden County has by far the most residents in treatment for SUDs, it still makes up only 23% of the total statewide.

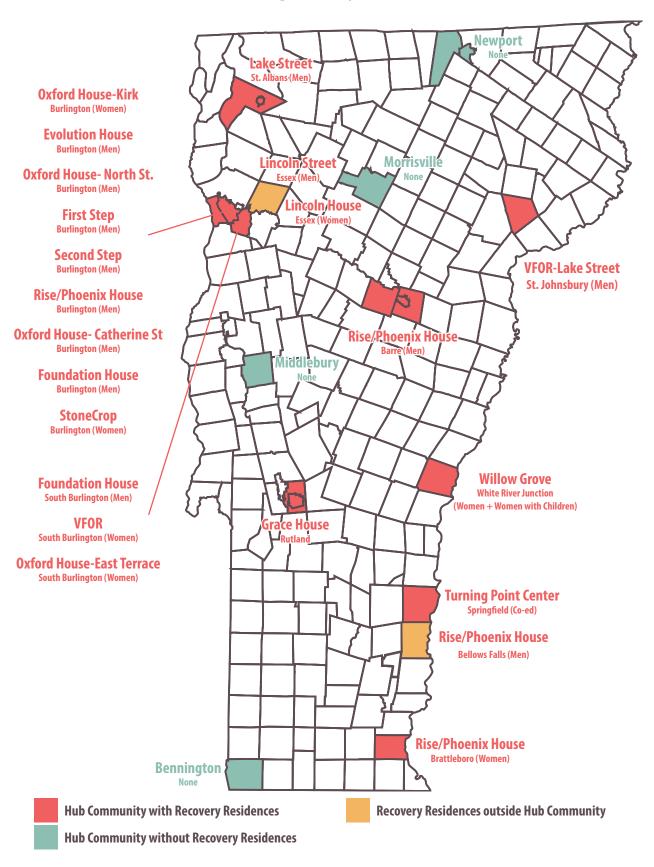

Five hub communities—Rutland, Middlebury, Bennington, Newport, and Morrisville, whose service areas treat one-quarter of all those with SUDs in the state — have no RRs.

Appendix B provides additional data from surveys of managers for these existing RRs. Some key findings from those interviews include:

- Most existing RRs have walking or public bus access to Treatment Centers that provide Medication Assisted Treatment (MAT)
- Phoenix House has some spaces reserved in their houses for Department of Corrections or ADAP referred residents
- The average length of stay for all of the residences is somewhere between five and eight months.

- Rent-equivalents range from \$100- \$140/ week for single or double occupancy rooms; and \$50-\$75/ week for Phoenix House's multiple occupancy rooms. Phoenix House noted that they collect on only about 60% of the rents that charge. All RR operators underwrite the cost of some of their residents.
- RRs seldom operate at full capacity although several maintain waiting lists for occupancy. Overall, the existing facilities function at between 80-85% occupancy. Operators describe lack of funding, limited referral awareness, and the logistics of multiple transitions, rather than demand, as the cause of vacancies.
- Most houses can provide space for someone interested within five or six weeks.

III-1: Hub Communities and Existing Recovery Residences in Vermont

IV. ESTIMATE OF THE GAP IN RECOVERY RESIDENCES NEED

1. Overall Recovery Residence Gap Statewide

A key goal of this assessment was an estimate of how many Vermonters, upon completion of their treatment, would meet all three of the following criteria: 1) they are at the appropriate level of recovery to live successfully in a Recovery Home; 2) their alternative housing options would undermine their recovery efforts; and 3) they would choose to take up the RR option if it was located near within their treatment hub, they knew about it, and it was affordable to them. There is no hard data to provide this magic number. Instead, having analyzed the data and asked the opinion of experts in the field, the consultant created three models for readiness, need and utilization based separately on a) housing status; b) gender and presence of children; and c) age cohort. Appendix C provides the model and the assumptions it uses. The consultant then averaged the three models to produce the following estimate of the gap between the current supply of RRs in the state and the need for that housing.

The consultant estimates that at least 1,200 individuals, or about 14% of the Vermonters entering treatment for an SUD in 2017, would benefit from access to a RR as a means of transition from a residential treatment facility or to support their recovery while in non-residential treatment. The consultant bases this estimate on a detailed breakdown of the housing status of new admits to treatment, as well as results from a 2017 survey of 84 service providers, and discussions with NARR, VTARR, and operators of Treatment Facilities, Treatment Centers, and Recovery Centers in Vermont. Key drivers for this need include:

- ▶ Homelessness: According to 2017 ADAP Housing Status data, over 900 individuals report their housing status as homeless at the start of treatment for SUDs.² Additionally, facility operators report that hundreds of others spend part of their time in residential treatment facilities or hospitals largely because they have nowhere else to live. According to the ADAP data, the number of homeless individuals in treatment has risen four-fold since 2000.
- Inability to Pay for Housing: more than three-quarters of those in state-funded SUD Treatment Facilities qualify to have Medicaid cover the cost of that treatment. For most individual persons in Vermont, the income limit for eligibility is \$16,764, a number that qualifies them as Extremely Low-Income (<30% of Area Median Income or AMI). For Medicaid recipients at any household size, the income limits would qualify them as below 50% of AMI. These represent the income levels where housing is most insecure, where cost burdens are greatest, and where the need for affordable housing options are most constrained. These roughly 8,000 Medicaid-eligible individuals in treatment constitute between 20% and 30% of all the Extremely Low Income Households in the state.

Insecure Housing as an Impediment to Recovery: The following comes from a report summarizing an October 2017 survey conducted by the Governor's Opioid Coordination Council and responded to by 84 treatment providers in Vermont:

"For 75% of respondents from across the state, housing issues and stressors are complicating (and potentially undermining) treatment and recovery progress in at least 1/3 of their cases—and for most of those respondents, between 66% and 100% of their clients are dealing with a housing situation that they think is interfering with the client's recovery."

28% of these respondents identified the need for RRs as the biggest gap in housing services available to their clients, while nearly half described affordability as the greatest challenge.

Currently, there are about 212 RR beds in Vermont, with a total potential to serve roughly 425 residents a year staying an average of six months. These beds are not distributed geographically or in terms of sex or the presence of dependent children to optimally serve those who need it. While it might take several hundred additional RR beds to meet the current backlog of need, it may be more useful to think of that need in terms of the ongoing demand. The consultant estimates that as many as 1,200 Vermonters annually enter SUD Treatment, who upon completion of their treatment would meet all three of the criteria: named above. To serve this population sustainably would require as many as 300 additional beds distributed statewide. The population with the greatest unmet need is women with dependent children.

2. Recovery Residence Need at the Hub Community Level

Figure IV.1 looks at those admitted to treatment for each of the key sub-groups—men, women, and women with dependent children—at the county level in 2017.

IV.1: New Admissions To Substance Use Disorder Treatment, By County and By Men, Women, and Women With Dependent Children, 2017

Hub Community & Counties Served	Men In Treatment	RR Beds	Women and Women w/ Dependent Children in Treatment	RR Beds
Middlebury Addison County	134	0	87	0
Bennington Bennington County	225	0	152	0
St. Johnsbury Caledonia Co. & Essex Co.	265	6	249	0
Burlington & S. Burlington Chittenden County	1312	81	752	33
St. Albans Franklin Co. & Grand Isle Co.	493	6	479	0

May Support Separate Hub Randolph Orange County	211	0	134	0

SOURCE: ADAP and Development Cycles Survey of RRs, 2018.

In the consultant's opinion, 20 admissions to treatment in a given year for each RR bed represents a conservative benchmark for the sustainable demand for RRs statewide. For a 6-person home the minimum treatment requirement then would be 120 men or women, or women with dependent children. Using that benchmark, here is a listing of the hubs where additional residences are needed.

IV.2: Estimated Need For Additional Six-Person Recovery Residences By Hub Community, 2019

Hub Community & Counties Served	For Men	For Women or Women with Dependent Children
Middlebury Addison County	1	0
Bennington Bennington County	1	1
St. Johnsbury Caledonia Co. & Essex Co.	1	2
Burlington & S. Burlington Chittenden County	0	1
St. Albans Franklin Co. & Grand Isle Co.	3	4
Morrisville Lamoille County	2	1
Newport Orleans County	1	1
Rutland Rutland County	3	4
Barre-Berlin Washington County	0	3
Brattleboro Windham County	0	1
Springfield & White River Junction Windsor County	2	0
Randolph (With Presence of Hub) Orange County	1	1
Total Number of Homes Needed	15	19

The consultant focused on those hubs that could, by this standard, support more than one new RR to establish his priority location and type of need as follows:

- Rutland City: one RR dedicated to men, and one dedicated to women and/or women with dependent children
- **St. Albans City:** one RR dedicated to men and one dedicated to women and/or women with dependent children
- ▶ <u>Barre/ Berlin (Montpelier)</u>: one RR dedicated to women and/or women with dependent children
- <u>Burlington and/or South Burlington</u>: one RR dedicated to women with dependent children
- **St. Johnsbury:** One RR dedicated to women and/or women with dependent children.
- Morrisville: one RR dedicated to men

Each of these priority hub communities has more than sufficient need to sustain the RRs recommended. Developing these priority RRs represent a substantial undertaking requiring a large commitment of money and human effort. These highest-priority projects also represent an opportunity to continue to test the efficacy and demand for units in this model before taking it to communities with lower overall levels of SUD Treatment.

NOTES

- 1 Not everyone in treatment for a SUD needs a recovery home nor is everyone in treatment at the right stage of recovery to make good us of the option if they had it. The National Association for Recovery Residences (NARR) has identified four stages of recovery, each based on the level of supervision and independence appropriate to the individual's wellbeing (see Appendix B for more information). The RR model assessed in this study is only for residents in Recovery Level I and II.
- 2 The 7-unit Springfield RR is open to men and women equally.
- 3 The 2017 Vermont State Housing Authority's "Annual Point in Time Statewide Count of the Homeless" counted a smaller number 228 of the 1,225 (19%) homeless persons in Vermont as describing themselves with an SUD.

V. HOUSING AVAILABILTY IN THE HUB COMMUNITIES

There are Treatment Centers and/or Recovery Centers located in 12 Vermont communities: Barre (with the Treatment Center in Berlin), Bennington, Brattleboro, Burlington, Middlebury, Morrisville, Newport, Rutland, St. Albans, St. Johnsbury, South Burlington, and Springfield.

The RR model calls for residents to live in large (4+ bedroom) single-family homes that have easy access to the hub Treatment and Recovery Centers. Public transportation is an important condition supporting recovery for this population; one that should not be overlooked in siting RRs. Many of these individuals have either had their licenses revoked or cannot afford the cost of a car. With all of their daily commitments to treatment, counseling, and work, public transportation is a critical factor. Access to food shopping is another key locational requirement.

To test for the availability of appropriate housing for RRs in the hub communities, the consultant utilized 2017 American Community Survey data to identify the number of single-family homes with more than four bedrooms, the number of 2-4 unit buildings, as well as the median rent, and the homeownership rate for the census tracts that contain (or in some instances are immediately adjacent to) these treatment and Recovery Centers. In addition, the consultant identified key public transit routes and bus schedules in these communities, and located supermarkets and food stores nearby to the Recovery and Treatment centers. Finally, the consultant provided pricing information and snapshots of large single-family homes and 2-4 family buildings currently on the market in these target neighborhoods to characterize the cost of acquiring housing in these neighborhoods. Appendix D provides a summary profile of the appropriate housing supply for each of the 12 hub communities.

The data indicates that there is an adequate supply of appropriate housing within easy access of the existing Treatment and Recovery Centers in each of these hub communities. All 12 hub communities have a stock of at least 200 large single-family homes (4+ bedrooms) or small multifamily properties (2-4 units) located within approximately one mile of the existing treatment and recovery centers. Most have more than 500 appropriately sized properties for rent or acquisition.

Bus lines do connect reasonably closely to Treatment Centers and Recovery Centers in 10 of the 12 hubs. Their frequency of service varies considerably with scheduled hourly service available in only about half of these hubs. Where regular and frequent bus service does not exist, it may be necessary to shrink the distance between the Treatment Center, Recovery Center, and RR. This could entail the need to relocate the existing Center in those communities where such a need could exist. Alternatively, where community support systems are strong, there may be the possibility to create some form of volunteer ride service for residents such as in more commonly offered to older residents or those in need of dialysis treatment. In most of the 12 hubs, supermarkets are at least as accessible as the Treatment or Recovery Center.

The 12 treatment hubs are located in the same communities that serve as the primary focus of affordable housing efforts in Vermont. For the most part, established nonprofit housing organizations base their operations in these same communities. Outside of Chittenden County, the Recovery Centers and Treatment Centers are located in neighborhoods with home values, rents, and household incomes that are often well below the statewide median. Ample stock combined with low acquisition prices and market rents in most of these target communities represents an opportunity to scale the RR model quickly. This advantage is balanced by the challenge of ensuring that these properties have enough value to cover acquisition and/ or renovation costs if their use changes.

VI. CHALLENGES, RECOMMENDATIONS & CONDITIONS FOR SUCCESS

1. Challenges

Despite the scale of demand for RRs, the concept needs to effectively address several substantial challenges, including the following:

- The effort will need to significantly strengthen the network providing non-residential services to the RR residents, in order to, among other things, increase the effectiveness of the residence as a stabilizing influence; build social capacity and integration; and improve the readiness assessment and referral process. The importance of building a sense of community, self-worthiness and belonging both within the residence and within the community as a whole is paramount. Addressing this challenge effectively will require increasing the capacity of some of Vermont's existing Treatment Centers and Recovery Centers, especially in their provision of psycho-social and life-skills services.
- Scaling RRs within a peer-support model will require expanding the number of coaches, mentors, housing managers, and in some cases caseworkers, from among those who are themselves in recovery. Some service providers expressed concern that the opioid crisis was already promoting individuals too quickly from being in recovery to helping others in recovery, thus placing a great deal of stress and responsibility on individuals who were themselves vulnerable. A thoughtful process of vetting, training and seasoning those working in this space needs to go hand in hand with funding for the service elements needed for a sustainably successful RR model.
- Managing the community's expectations represents another major challenge. The problem these residences are helping address is daunting. They will primarily serve residents with opioid addictions that carry an extraordinarily high relapse rate and potentially catastrophic consequences with each use. Despite the universal nature of addiction, the reality is that those in greatest need for these RRs are predominantly young and extremely low income individuals, with low levels of employment, and relatively high levels of prior homelessness and co-occurring mental health issues. These residences will be located primarily in communities and neighborhoods where the incidence of drug and alcohol use and dependence are highest. It would be tragically naïve to imagine that these residences will not experience serious setbacks, including incidents of violence, drug dealing, overdose deaths, and adverse interactions with neighbors. Nothing will be more important to success in scaling the RR concept in Vermont than the commitment by stakeholders to building realistic

- expectations, resilience to setbacks, and long-term support for addressing these daunting challenges among those providing financial and community leadership.
- The concept that residents pay something to live in a RR is pretty much universally applied. At the same time, residents seldom have the capacity to cover the true costs needed to acquire (or rent), renovate, furnish, and maintain a home, much less pay for the in-house services required. The consultant estimates that less than 30% of all Vermonters receiving treatment for SUDs can afford to pay more than \$100/ week for housing during their tenure in a RR. Many will be unable to pay anything for the first few months of residency. Finding sustainable sources of revenue to bridge the gap between resident contributions and true costs will be critical.
- ▶ A RR is special needs housing that will be located, with few exceptions, in areas of Vermont where the demand for large single-family homes is weakest. Siting these residences will require even more sensitivity to its immediate surroundings than does traditional affordable rental housing, for it needs to balance convenience to treatment, buffer residents from negative community influences, and have the capacity to build a welcoming response from abutters and neighbors. That will be no small task. Even with a well-sited property, the RR provider looking to acquire or substantially renovate such a home may face a serious challenge demonstrating that those costs can be recouped if the property stops functioning as a RR. Some combination of the following strategies may be needed to address this challenge effectively:
 - Leasing rather than owning the RR
 - Fundraising rather than borrowing for acquisition and/or rehabilitation costs
 - Repurposing homes that are already in the non-profit housing or special needs housing portfolio
 - Negotiating long-term service contracts and operating subsidy commitments as a pre-condition to acquisition
 - Selecting only those single-family properties that have viable adaptive reuse potential as small multi-family rentals
 - Modifying the RR model to allow for the RR to have separate apartments within existing 2-4 family buildings
 - Attaching project-based rental assistance that can transfer to a change of use if needed
 - Funding a loss-reserve pool or loan guarantee program available to the portfolio of VTARR certified properties.

2. Recommendations

The consultant recommends that, provided certain conditions can be met, RRs options in the state be increased significantly, starting in these communities with the highest priority needs:

- Rutland City: one RR dedicated to men, and one dedicated to women and/or women with dependent children
- St. Albans City: one RR dedicated to men and one dedicated to women and/or women with dependent children
- **<u>Barre/ Berlin (Montpelier)</u>**: one RR dedicated to women and/or women with dependent children
- **Burlington and/or South Burlington:** one RR dedicated to women with dependent children
- **St. Johnsbury:** One RR dedicated to women and/or women with dependent children.
- Morrisville: one RR dedicated to men

Each of these priority hub communities has more than sufficient need to sustain the RRs recommended. Developing these priority RRs represents a substantial undertaking requiring a large commitment of money and human effort. These highest-priority projects also represent an opportunity to continue to test the efficacy and demand for units in this model before taking it to communities with lower overall levels of SUD Treatment.

3. Conditions for Success

These recommendations are predicated on the ability of VTARR and the other key stakeholders to successfully address the challenges identified in the assessment, specifically, the need to:

- Strengthen the delivery of wrap-around services by strengthening the network of service providers that play a programmatic role with the RR and its residents.
- Develop these projects at a pace that ensures a strong, seasoned and well-trained supply of mentors, coaches, house managers and case managers to whatever degree these roles interact with the residents of these RRs.
- Stress the importance of building a sense of community, self-worthiness and belonging both within the RR and within the community as a whole.
- Find a sustainable funding mechanism to bridge the gap between the true operational cost of a well-functioning RR and the extremely limited capacity of most residents to cover that cost.
- Commit to investing in the community organizing and messaging aspects of the process in order to manage expectations and build the capacity and resilience needed to address the inevitable setbacks the RR's residents will face.

Appendix B

DETAILS ABOUT THE RECOVERY RESIDENCE CONCEPT

Provided by David Riegel, Vermont Foundation for Recovery with additional information provided by the consultant

LEVELS OF RECOVERY RESIDENCE: The National Association of Recovery Residences (NARR) provides the following criteria for determining the level of care appropriate to individuals at different stages of recovery. **This assessment looks specifically at Recovery Residents serving individuals at Level I and Level II.**

	RECOVERY RESIDENCE LEVELS OF SUPPORT						
Co	NARR National Alliance for Recovery Residences sommunity - Standards - Ethics - Education	LEVEL I Peer-Run	LEVEL II Monitored	LEVEL III Supervised	LEVEL IV Service Provider		
	ADMINISTRATION	-Democratically run -Manual or P&P	-House manager or senior resident -Policy and Procedures	-Organizational hierarchy -Administrative oversight for service providers -Policy and Procedures -Licensing varies from state to state	-Overseen org. hierarchy -Clinical and administrative supervision -Policy and Procedures -Licensing varies from state to state		
STANDARDS CRITERIA	SERVICES	-Drug Screening -House meetings -Self help meetings encouraged	-House rules provide structure -Peer run groups -Drug Screening -House meetings -Involvement in self help and/or treatment services	-Life skill development emphasis -Clinical services utilized in outside community -Service hours provided in house	-Clinical services and programming are provided in house -Life skill development emphasis		
ST	family residences fam -Poss or o type		-Primarily single family residences -Possibly apartments or other dwelling types	-Varies—all types of residential settings	-All types—often a step down phase within care continuum of a treatment center -May be a more institutional environment		
	STAFF	-No paid positions within the residence -Perhaps an overseeing officer	-At least 1 compensated position	-Facility manager -Certified staff or case managers	-Credentialed staff		

SERVICES OFFERED: The greatest value of a RR is the peer-to-peer support provided by the environment. Therefore, most homes don't offer any direct services and instead try to create an atmosphere where people can learn and grow from the experiences of those around them. The extent to which the operators influence the atmosphere of the home will vary from levels I through IV. Many lessons are learned through communal living simply as a result of the peer-to-peer social model such as cleanliness (both personal and of the home), cooking/nutrition, financial management, work ethic, and personal responsibility.

SERVICE PROVIDERS: Most homes will look to connect house members with services in the community. This will often be through Recovery Centers, 12 step programs, counseling or therapy, employment resources and may include nutrition, financial, medical, and physical health services. Some RRs have an on-site house manager others do not.

OWNERSHIP STRUCTURE: RRs operate under various ownership structures. In Vermont, that could include having a separate nonprofit such as the Vermont Foundation of Recovery that owns or leases several homes around the state; nonprofit housing organizations such as Downstreet; Treatment Centers or Recovery Centers such as the home operated by the Turning Point Recovery Center in Springfield, VT; or a private owner. The key going forward is that these homes be in some way accredited by VTARR to ensure standards and promote best practices.

MANAGEMENT ISSUES: Operational decisions may vary based on the type of home and level of recovery involved. Some homes will allow the current house members to vote and have absolute say over who moves in while other homes will approve new house members and only allow the current members to voice concerns. Length of stay is also dependent on each home. Some will set a limit of a year while others have no limit at all. Most seem to encourage people to move on when they have become stable in their recovery and are ready to take the next step. This is both for the individual's growth and to make the spot available to someone who needs it. The home's operator sets the cost for each house member which may fluctuate depending on if the person is in a single, double, or triple room and how much responsibility they take on in the home.

COMMUNITY ENGAGEMENT: RRs should be good neighbors and have an ethic of giving back to their neighborhoods and communities. There should be participation in volunteer events, helping neighbors in need with projects around their homes, as well as making sure the RR is well maintained to fit in with the character of the neighborhood. One of the main tenants of recovery is helping others. The people living in an RR should be actively participating in their own recovery and want to be helpful to the people living around them. In addition RRs have house rules that will include maintaining the outside of the home and participation in events to give back to the community.

PERMITTING REQUIREMENTS: At the moment there is nothing in Vermont law that recognizes RRs as any type of entity. The Americans with Disabilities Act protects people in recovery and the Fair Housing Act says people with disabilities must be treated equally. It has been litigated at the federal level with an end result that RRs must be treated the same a Single Family Homes from a zoning standpoint.

Willow Grove has no desire to expand; however, general need for adolescent treatment centers and sober living exists in Rutland, Montpelier, Upper Valley.	The need is there. Our desire is there. The limiting factors are resources: money and my capacity to do everything that needs doing with limited staff.

Appendix C

ADDITIONAL DATA ON RECOVERY RESIDENCE NEED

Definitions of Levels of Treatment for Vermonters with a Substance Use Disorder

<u>Outpatient Treatment (OP)</u>: ASAM Level 1- An organized nonresidential treatment service or an office practice with designated addiction professionals and clinicians providing professionally directed alcohol and other drug treatment that is co-occurring capable. This treatment occurs in regularly scheduled sessions usually totaling fewer than 9 contact hours per week.

Intensive Outpatient Treatment (IOP): Level 2.1—An outpatient program with 9-18 hours of structured programming per week, consisting primarily of counseling and education about substance-related and mental health problems. The patient's needs for psychiatric and medical services are addressed through consultation and referral arrangements if the patient is stable and requires only maintenance monitoring. (Services provided outside the primary program must be tightly coordinated.

Residential Services: ASAM Level 3.7 Co-Occurring Enhanced Program. Level 3.7 programs provide a planned and structured regiment of 24-hour professionally directed observation, medical monitoring, and addiction treatment in an inpatient setting. They feature permanent facilities, including patient beds and functions under a defined set of policies, procedures, and clinical protocols. They are appropriate for patients with sub-acute biomedical and emotional, behavioral or cognitive problems so severe that they require inpatient treatment but who do not require the full resources of an acute care general hospital or a medically-managed inpatient treatment program. Co-occurring enhanced programs offer appropriate psychiatric services, medication evaluation, and laboratory services and provide a psychiatric assessment within 24-hours following admission and thereafter as medically necessary. Programs must comply with the requirements of ASAM Third Edition.

Hub & Spokes: A Hub is a specialty treatment center responsible for coordinating the care of individuals with complex opioid addictions and co-occurring opioid substance use and mental health conditions across the health and substance use treatment systems of care. Hubs will provide comprehensive assessments and treatment protocols; all methadone treatment is provided in hubs. For a subset of buprenorphine patients with clinically complex needs, hubs may: serve as the induction point and provide care during stabilization; coordinate referrals and provide support for ongoing care, prevention and treatment of relapse; and provide specialty addictions consultation. Hubs may provide care for patients for whom naltrexone is the medication of choice. Hubs may also provide support for tapering off MAT. Hubs are expected to maintain continuous and long-term relationships with selected clients. Programing will reflect the chronic and relapsing nature of addictions and be able to engage and re-engage clients in services. Hubs will also proactively assure that clients leaving their services have clinically appropriate referrals (e.g. to other hubs, MAT prescribers, health care, housing, recovery, and human services), that such referrals are completed to the extent

that there are entities to accept such referrals, and that the clients are not lost to contact. Hubs are Health Homes and will achieve and maintain the

<u>Case Management (CM)</u>: Recipients are assisted with linkage to a community-based system of care. CMs coordinate service with the recipient, family, treatment provider and assists with negotiating various service systems. Develops an individualized community service plan and facilitates implementation, monitors services received, documents activities, and initiates periodic review.

2/14/24

NORTH ★862 **♥**Q98 **♦ K** 8 WEST **EAST** ♠ K 7 4 3 **♦** J 10 9 **♥**64 **♦** 10 7 6 5 2 ♦ A Q 9 4 **♣**843 **♣**K Q 10 6 **SOUTH** ♥ A K J 10 7 3 2 **♦** J 3

•9 The bidding: South West North East 2 **♣** 4 **♥** Pass Pass Pass

Opening lead — five of diamonds. An instinctive play is not necessarily the correct play, as East discovered to his sorrow on this deal.

West led the five of diamonds against four hearts. Declarer played low from dummy, hoping West had the queen, but East won with the queen and cashed the ace.

When West followed suit with the deuce of diamonds, East knew his partner had led from a five-card suit, but without giving the matter further thought, he returned the

natural thing to do, but it eventually cost East the contract.

South went up with the ace of spades, led a club to the ace and ruffed a club. He next led a low trump to dummy's eight, ruffed another club, played a trump to the nine and ruffed still another club, establishing dummy's jack as a trick. Declarer then led a trump to the queen and discarded a spade on the jack of clubs, losing a spade at the end to make the contract.

Granting that East's spade return at trick three looked very attractive, it was nevertheless the wrong play. Had he returned a trump instead, South would have gone down one.

The advantage of the trump return is that it uses up one of dummy's entries prematurely. South can still establish a club trick if he wants to, but he will be unable to reach it and must eventually lose two spade tricks.

East should reason that any spade losers South might have cannot fly away if he returns a trump, since his club holding assures that declarer will not be able to establish and utilize an extra winner in the club suit. However, a spade return might allow declarer to establish dummy's fifth club, with dummy's third trump providing the critical jack of spades. This seemed a very entry to collect it.

Property of CARRIE BRADSHAW (Map 006, Lot 050-15; 19 Buick Street)

The resident and nonresident owners, lien holders and mortgagees of lands and premises in the Town of Barre, in the County of Washington, are hereby notified that the taxes, assessments, charges and/or levies assessed by such Town for the years 2018/2019, 2019/2020, 2020/2021, 2021/2022, 2022/2023, and 2023/2024 remain. either in whole or in part, unpaid on the following described property in

Being the property commonly known as 19 Buick Street, and more particularly described as all of the same lands and premises conveyed to Carrie Bradshaw by Warranty Deed of Gerard A. Groleau and Jeanne A. Groleau, dated May 16, 2016, and recorded in Book 286 at Page 63 of the Land Records of the Town of Barre, together with the 2003 Dutch Model DT2860 20'x60' mobile home, serial number 35254D, located

and so much of such lands and premises will be sold at public auction at the Barre Town Municipal Offices in Websterville, Vermont, a public place in such Town on the thirteenth (13th) day of March, 2024, at two-fifteen o'clock (2:15) in the afternoon as shall be requisite to discharge such taxes, assessments, charges and/or levies with costs and fees unless previously paid.

> Christopher Violette, Town of Barre Collector of Delinquent Taxes Assessments, Charges and Levies

PUBLIC NOTICE

The State of Vermont's Department of Housing and Community Development (DHCD) is seeking input from stakeholders on the Second Amendment to the Vermont Recovery Housing Program Action Plan (RHP) that is to be submitted to the US Department of Housing and Urban Development (HUD) for the Recovery Housing Program's FY23 allocation of \$991,106. The State of Vermont has been allocated RHP funds for FY20-FY23 that are intended to be used to address the needs of transitional housing for people recovering from substance use disorder in the State. The RHP Action Plan outlines priorities for the use of approximately \$3.3 million in federal funds being provided to the State.

The Second Amendment can be found on DHCD's website at: https://accd.vermont.gov/community-development/fundingincentives/vcdp/recovery-housing-program.

Please send all comments via email to Cindy.Blondin@vermont.gov or mail to Cindy Blondin, Grants Management Analyst, Vermont Department of Housing and Community Development, 1 National Life Drive, Davis Building, 6th Floor, Montpelier, VT 05620 by 4:30 p.m. on Friday, March 1, 2024.

AVIS PUBLIC

Le Département du logement et du développement communautaire (DHCD) de l'État du Vermont sollicite l'avis des parties prenantes sur le deuxième amendement au plan d'action du programme de logement de rétablissement du Vermont (RHP) qui doit être soumis au Département américain du logement et du développement urbain (HUD). pour l'allocation de 991 106 \$ du programme de logement de rétablissement pour l'exercice 23. L'État du Vermont s'est vu attribuer des fonds RHP pour les exercices 20 à 23, destinés à être utilisés pour répondre aux besoins de logements de transition pour les personnes se remetlant besoins de logements de transition pour les personnes se remettant d'un trouble lié à l'usage de substances dans l'État. Le plan d'action RHP définit les priorités pour l'utilisation d'environ 3,3 millions de dollars de fonds fédéraux fournis à l'État.

Le deuxième amendement peut être consulté sur le site Web du DHCD à l'adresse : https://accd.vermont.gov/community-development/funding-incentives/vcdp/recovery-housing-program.

Veuillez envoyer tous vos commentaires par courrier électronique à <u>Cindy.Blondin@vermont.gov</u> ou par courrier à <u>Cindy.Blondin.analyste</u> de la gestion des subventions, Vermont Department of Housing and Community Development, 1 National Life Drive, Davis Building, 6th Floor, Montpelier, VT 05620 par 4 : 30 heures le vendredi 1er mars

NOTICIA PÚBLICA

El Departamento de Vivienda y Desarrollo Comunitario (DHCD) del Estado de Vermont está solicitando comentarios de las partes interesadas sobre la Segunda Enmienda al Plan de Acción del Programa de Recuperación de Vivienda (RHP) de Vermont que se presentará al Departamento de Vivienda y Desarrollo Urbano (HUD) de EE. UU. para la asignación del año fiscal 23 del Programa de Vivienda de Recuperación de \$991,106. Al estado de Vermont se le han asignado fondos RHP para los años fiscales 20-23 que están destinados a abordar las necesidades de viviendas de transición para las personas que se recuperan de un trastorno por uso de sustancias las personas que se recuperan de un trastorno por uso de sustancias en el estado. El Plan de Acción de RHP describe las

prioridades para el uso de aproximadamente \$3,3 millones en fondos federales que se proporcionan al Estado

La Segunda Enmienda se puede encontrar en el sitio web del DHCD en: https://accd.vermont.gov/community-development/funding-incentives/vcdp/recovery-housing-program.

Envíe todos los comentarios por correo electrónico a Cindy.Blondin@vermont.gov o por correo electronico a Cindy.Blondin@vermont.gov o por correo a Cindy Blondin, analista de gestión de subvenciones, Departamento de Vivienda y Desarrollo Comunitario de Vermont, 1 National Life Drive, Davis Building, 6th Floor, Montpelier, VT 05620 antes de las 4: 30 p.m. el viernes 1 de marzo de 2024.

ASSURANCES - CONSTRUCTION PROGRAMS

OMB Number: 4040-0009 Expiration Date: 02/28/2025

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0042), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the Awarding Agency. Further, certain Federal assistance awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant:, I certify that the applicant:

- Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of project described in this application.
- Will give the awarding agency, the Comptroller General
 of the United States and, if appropriate, the State,
 the right to examine all records, books, papers, or
 documents related to the assistance; and will establish
 a proper accounting system in accordance with
 generally accepted accounting standards or agency
 directives.
- 3. Will not dispose of, modify the use of, or change the terms of the real property title or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the Federal awarding agency directives and will include a covenant in the title of real property acquired in whole or in part with Federal assistance funds to assure non-discrimination during the useful life of the project.
- 4. Will comply with the requirements of the assistance awarding agency with regard to the drafting, review and approval of construction plans and specifications.
- 5. Will provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progressive reports and such other information as may be required by the assistance awarding agency or State.
- Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
- 7. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

- Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards of merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
- Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
- 10. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681 1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29) U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee 3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statue(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statue(s) which may apply to the application.

- 11. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal and federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
- 12. Will comply with the provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
- 13. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327-333) regarding labor standards for federally-assisted construction subagreements.
- 14. Will comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
- 15. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of

- Federal actions to State (Clean Air) implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).
- Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
- Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq).
- 18. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
- Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.
- 20. Will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act (TVPA) of 2000, as amended (22 U.S.C. 7104) which prohibits grant award recipients or a sub-recipient from (1) Engaging in severe forms of trafficking in persons during the period of time that the award is in effect (2) Procuring a commercial sex act during the period of time that the award is in effect or (3) Using forced labor in the performance of the award or subawards under the award.
