Subject: 2018 JT So-Burlington VT Laboratory Qualification for VTrans Projects

Dear Chris,

The Vermont Agency of Transportation's (VTrans) Independent Assurance Unit completed a follow up lab inspection on April 17th, 2018 at the John Turner Labs in South Burlington, VT facility to qualify the lab to provide testing services for VTrans Construction projects. The equipment calibrations and personnel qualifications and certifications, as reviewed, meet the requirements as defined in VTrans' Quality Assurance Program (QAP). By maintaining these records and requirements the results from the tests you are qualified for will be used in the acceptance decision for VTrans projects in 2018.

Additionally, as outlined in VTrans' QAP, personnel performing acceptance sampling and testing on project(s) or in the laboratory will be subject to sample comparisons, technician proficiency evaluations (TPE), and equipment checks as well as a Lab Assessment during the construction season.

The above stated facility is approved in the following tests for 2018:

Note; this list of tests was requested by you.

AASHTO: T11, T27, T99, T180.  
ASTM C39 (Compressive strength Cylinder)

Please do not hesitate to contact me at 802-828-6923 if you or your staff has any questions.

Regards,

Donal Morris
