

The screenshot shows a web application interface for a map-based data system. At the top, there's a search bar with a magnifying glass icon and the placeholder text "Find address or place". Below the search bar, a dropdown menu displays "(1 of 2)". The main area features a table with two columns: a descriptive field name and its corresponding value. The fields include physical dimensions like Width (in.) and Length (ft.), structural details like Culvert type and Drop inlet/catchbasin?, ownership information like Owner, and various comments. Numerical values are provided for Depth of cover (ft.), Comment - numeric, Year built, latitude, longitude, CTcode, and GlobalID. Some fields have unknown or null values. At the bottom left, there is a blue link labeled "Zoom to". The background of the page is a satellite map view.
