Vermont Better Roads Grant Program

## **CATEGORY B/C/D**

Please co	mplete one application p	oer projec	t you are ap	plying for.	
Please check the Category you	are applying for:				
<ul> <li>B. Correction of a Road F</li> <li>C. Correction of a Stream</li> <li>D. Structure/culvert 36"</li> </ul>	Related Erosion Problem n Bank, Lake Shore or Slc diameter or greater	and/or S ope Relate	tormwater N ed Problem	Aitigation	
Municipality:	Johnson Town				
Road Name:Foot Brook	RdTH #: _	7	_Structure #	(if applicable	):
Road Type: Paved or Un	<mark>paved</mark> (select one)	Road (	Class: 1	2 <mark>3</mark> -	4 (select one)
Please provide a thorough des	cription of the erosion/v	vater qua	lity problem	ı (ex. Roadway	has steep slope
with no ditch which is causing	severe roadway erosion	, which o	utlets into tł	ne Lamoille Riv	/er):
Roadway has little to no estab	lished ditch due to filled	in past d	itches. Exter	isive erosion p	resent in each
connected segment. Water ov	er runs existing ditches o	during rai	n events, ca	using erosion	of the road
surface and ditches. The erosi	on problems on this road	d causes s	ediment to	flow into the l	amoille River.
Has the town completed an M Yes No	IRGP compliant road ero	sion inve	ntory?		
Project Length (linear feet alo Number of structures/culverts Average slope of roadway:	ng roadway): _2700_ ft. s replaced/repaired: 0-5%	_2 5-10%	□ >1	.0%	
Provide a VERY detailed map of Provide a sketch of project loc	of project location showi ation showing distances	ng start a and proj	nd end poin ect details:	ts: Include	ed ed

Please provide the Road Segment ID (RSID) for your project. If several, please list all. In addition to the RSID please indicate what the resulting rating of each segment before construction as well as after

construction in accordance with the MRGP.\* (i.e., Fully Meets Standard, Partially Meets, Does Not Meet) For assistance, please contact Better Roads Staff (802)828-4585.

	Hydrol	ogically	Pre-co	onstruction	MRGP	Post-	construction	MRGP
	Connected?		Conformance				Conformance	
			Fully	Partially	Does Not	Fully	Partially	Does Not
RSID	Yes	No	Meets	Meets	Meet	Meets	Meets	Meet
98868	x		х			Х		
98869	х		Not origi	nally inver	toried	Х		
98870	х		Not origi	nally inver	ntoried	Х		
98871	х				х	Х		
98872	х				х	х		
98875	х				Х	х		
98876	x			х		х		
98879	х			x		Х		

\*In order to "Fully Meet" the standards the road segment must have proper crown, removal of shoulder berms, proper ditching, proper conveyance and no erosion present at culvert inlets and outlets. Environmental Concerns:

All projects require a review of potential impacts by our environmental team. To expedite the review process, please check the boxes below that describe existing structures/conditions to be replaced/maintained (if any) and the project description that applies (if any).

Existing Structures:				
Steel/Plastic Culvert	Concrete Box Culvert			
Stone Culvert – Take pictures	Concrete Bridge			
Ditch	Rolled Beam/Plate Girder Bridge			
Foundation remains, mill ruins, stone walls, other –	Stone abutments or piers – <b>Take pictures</b>			
Take pictures				
Buildings within 300 feet of work - Take pictures				
Project Des	scription:			
New ditches will be established	All work will be completed from the existing			
	road or shoulder			
Reestablishing existing ditches only	There will be excavation within 300 feet or a			
	river or stream – <b>Take pictures</b>			
The structure is being replaced on existing	Road reclaiming, reconstruction, or widening			
location/alignment				
Excavation within a floodplain – Take pictures	Temporary off-road access is required			
Tree cutting/clearing – <b>Take pictures</b>	The roadway will be realigned			

**Please describe the project and how it will create a positive water quality benefit** (ex. Reshape 500' of ditch and line with 12 inch minus stone, to prevent sediment from entering the Lamoille River at the bottom of the hill):

Reestablish 3800 feet of stone and grass lined ditching to prevent erosion in the ditches. Reestablishing the ditches will also prevent water from overtopping the road during rain event. Removing the shoulder berm on all segments allows water to shed off the roads preventing erosion. Headers and conveyance zones around the existing culverts will be armored to reduce erosion around the existing culverts.

Please list any professionals or partners that assisted with planning this project (ANR River Management Engineer, Army Corps of Engineers, VTrans staff, Basin Planner, RPC staff, etc.): The Towen worked with the regional planning commission staff to produce this application and conduct site visits.

Is the project located in the town "Right of Way? (select one) 📕 Yes 🔲 No 🔲 Both
Please be aware, Municipalities are required to have an Agreement for Entry & Liability Release for any
impacted properties (prior to the start of construction.)

## **Budget:**

Please attach a project budget and confirm below that is attached:

Are you applying to other grant programs to help fund this project? If so, what programs? Please note that Better Roads requires a 20% local match and Better Roads funding may not be used as match for other state or federally funded programs.

+ Local Match: =	<b>\$</b> 5,747.44	\$40,000 Category C \$60,000 Category D See page 6 for more information	on
Total Project Cost:	\$ 25,747.44	calculating match	

Estimated Completion Date: June 30, 2025

#### REQUIRED ATTACHMENTS:

Х

Please use the documentation checklist below to ensure that all of the relevant items regarding your application have been included. It is preferred that your application is a single PDF file.

- Grant application cover sheet
- Grant application form, including chart with RSID and MRGP compliance before and after project completion
- Itemized Cost estimate for labor, equipment, and materials (see enclosed Cost Estimate
- Worksheet). If applicable, please break down funding by source (i.e. different grant sources). Detailed Project Location Map
- Sketch of proposed project and erosion control measures or other management practices, including distances in feet
  - Also show approximate location of town/other right-of-way and/or property lines and limits of work
- Photos must be color and clear to see.
  - Please make sure there are enough photos to get a good idea of the project area
- Other appropriate supporting documents.

By signing this application, I certify that all the information provided is accurate to the best of my knowledge. We will comply with all the requirements of the grant including making our books available for audit if required.
