

FY2025 Vermont Better Roads Grant Program **Cover Sheet**

Please complete this page ONCE and return with your Grant Category Application(s)

Town/Organization: Shaftsbury

Primary Contact Person (Responsible for Signing Grant Agreement): Mike Yannotti

Title: Road Foreman

Address: P.O. Box 409, Shaftsbury, VT 05262

Primary Contact Person Email: dpw@shaftsburyvt.gov Phone: 802-379-1547

SAM unique ID #: DKZMSLWL4UP9 Fiscal Year End Month (MM):06

Town Clerk / Admin email: administrator@shaftsburyvt.gov

Road Foreman Name: Mike Yannotti Road Foreman Email:dpw@shaftsburyvt.gov

CATEGORY B/C/D

Please complete one application per project you are applying for.

| Please check the Category you are applying for: | | | | | | | | |
|---|--|--|--|--|--|--|--|--|
| X B. Correction of a Road Related Erosion Problem and/or Stormwater Mitigation | | | | | | | | |
| □ C. Correction of a Stream Bank, Lake Shore or Slope Related Problem □ D. Structure/culvert 36" diameter or greater | | | | | | | | |
| Municipality: Shaftsbury, VT | | | | | | | | |
| Road Name: Daniels Rd, Glastenview Dr TH #:TH44, TH25 | | | | | | | | |
| Road Type: Paved or Unpaved (select one) Road Class: 1 2 3 4 (select one) | | | | | | | | |
| Please provide a thorough description of the erosion/water quality problem. This project was identified a | | | | | | | | |
| a high priority project in the Shaftsbury Storm Water Master Plan. These road segments are | | | | | | | | |
| hydrologically connected and do not currently meet the MRGP BMP standards. Extreme stormwater | | | | | | | | |
| runoff from these steep grades is eroding the inlets and outlets of several cross culverts and creating | | | | | | | | |
| gullies in the existing ditches. Large amounts of sediment are being transported into a nearby wetland | | | | | | | | |
| which feeds Paran Creek, a major tributary to the Walloomsac River. The 24-inch drainage culvert at the | | | | | | | | |
| intersection of Daniels Road and Glastenview Drive will be upgraded in size to 36 inches to better handle | | | | | | | | |
| the storm water flows. The damaged 18-inch drainage culvert with collapsed headers on Daniels Road | | | | | | | | |
| will be upgraded to a 24-inch culvert. One undersized driveway culvert in poor condition on Glastenview | | | | | | | | |
| Drive will be upgraded to an 18-inch culvert. Upgrading these three culverts to larger sizes will alleviate | | | | | | | | |
| the extreme fire house effects that are severely eroding the existing unlined ditches. In total, 500 feet of | | | | | | | | |
| existing ditches will be reshaped and stabilized with 12-inch minus stone. | | | | | | | | |
| Has the town completed an MRGP compliant road erosion inventory? Yes No In progress | | | | | | | | |
| Project Length (linear feet along roadway): 750 ft. Number of structures/culverts replaced/repaired: 4 Average slope of roadway: | | | | | | | | |
| Provide a VERY detailed map of project location showing start and end points: Included Provide a sketch of project location showing distances and project details: Included | | | | | | | | |

Please provide the Road Segment ID (RSID) for your project. If several, please list all. In addition to the RSID please indicate what the resulting rating of each segment before construction as well as after

construction in accordance with the MRGP.* (i.e., Fully Meets Standard, Partially Meets, Does Not Meet) For assistance, please contact Better Roads Staff (802)828-4585.

| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |

^{*}In order to "Fully Meet" the standards the road segment must have proper crown, removal of shoulder berms, proper ditching, proper conveyance and no erosion present at culvert inlets and outlets. Environmental Concerns:

All projects require a review of potential impacts by our environmental team. To expedite the review process, please check the boxes below that describe existing structures/conditions to be replaced/maintained (if any) and the project description that applies (if any).

Vermont Better Roads Program

Dear Alan,

Please accept this letter of support for Shaftsbury's FY2025 Better Roads Category B application to upgrade three undersized culverts, rebuild culvert headers and stabilize 5000 feet of severely eroded ditches with 12-inch minus stone on Daniels Road and Glastenview Drive in Shaftsbury, Vermont. In 2019 Fitzgerald Environmental produced The Shaftsbury Storm Water Master Plan which identified this as a high priority project due to the extreme amounts of stormwater draining these steep roads and contributing vast amounts of sediment to a wetland which drains into Paran Creek. I have recently visited the site with the Shaftsbury Road Foreman and completed a MRGP reassessment of these road segments. With the approval of the Town of Shaftsbury I added one segment of Daniels Road to the inventory of hydrologically connected roads due to their steepness and obvious contribution to the stormwater erosion issues present. This project will bring these road segments into compliance with the MRGP and prevent sedimentation from entering Paran Creek, a major tributary of the Walloomsac River. Thank you.

Sincerely,

Jim Henderson, BCRC Environmental Program Manager

Lenderson

NOTES

This grant will address a high priority site in the Shaftsbury Stormwater Master Plan by replacing three undersized culverts and installing new stone-lined ditches.
