Re: Request For Qualification (RFQ), Design-Build-Own-Operate-Maintain (DBOOM) , Electric Vehicle Supply Equipment (EVSE), VTrans response to questions.

Interested Parties,

Please note the following questions that were submitted during the question period for the Design-Build-Own-Operate-Maintain (DBOOM) , Electric Vehicle Supply Equipment (EVSE) RFQ, which concluded on 07/09/2026. The Vermont Agency of Transportation (VTrans/Agency) has provided responses to these questions, highlighted in blue.

1. Funding Structure Clarification: We are seeking clarification on the incentive funding structure. The RFQ states that the incentive may cover up to 80% of eligible project costs. Will there be a maximum reimbursement \$ amount per site? If yes, please explain the structure.
 - a. The RFQ includes anticipated project specifications and key requirements for potential future VTrans Requests for Proposals (RFPs) for EVSE installation and operation. Any additional pricing requirements, including site-specific maximum reimbursement amounts, will be included in future RFPs.
2. Is there a total cap for one organization when spread across multiple sites?
 - a. The RFQ includes anticipated project specifications and key requirements for potential future VTrans Requests for Proposals for EVSE installation and operation. Any additional pricing requirements, including organizational maximum reimbursement amounts, will be included in future RFPs.
3. We reviewed the recent RFP posted for " Electric Vehicle Supply Equipment " and have a quick question. If known, what is the expected start date for construction?
 - a. VTrans does not have any open RFPs for EVSE-related projects at this time. This solicitation is an RFQ. The purpose of this Request for Qualifications (RFQ) is to onboard additional qualified Interested Parties and establish a shortlist of firms eligible to submit competitive proposals in response to future Requests for Proposals (RFPs) issued by VTrans for EVSE-related projects.
 - b. Future RFPs will be open to shortlisted firms with a goal for construction activity associated with the next RFP opportunity to occur during the 2027 construction season.
