

41-A[®]

Drift Control Agent

A dry-flowable **drift control/deposition aid** that hydrates and mixes easily with agricultural pesticides, 41-A reduces drift by materially reducing fines resulting from shear. 41-A may be applied both aerially or by ground in agricultural or industrial uses.

Principal Functioning Agents:	Polyacrylamide polymer	27%
	Polysaccharide polymer.	3%
Constituents Ineffective As Spray Adjuvants:		<u>70%</u>
Total		100%

When used in accordance with good agricultural practice, 41-A is exempt from the requirements of a tolerance as specified in Code of Federal Regulations, Title 40, part 180.1001(c)(d).

KEEP OUT OF REACH OF CHILDREN

CAUTION: May cause eye and skin irritation.

Do Not Get in Eyes or On Skin • Harmful if Swallowed.

FIRST AID: If accidental contact with eyes, skin, or clothing occurs, immediately flush thoroughly with water for 15 minutes. If irritation persists, get medical attention.

MIXING DIRECTIONS:

Loaders and applicators should take appropriate precautions consistent with the label on other pesticides being used with 41-A. Care must be taken to avoid dust contact with eyes. Similar precautions must be taken to avoid ingesting dust from this product.

41-A should be gently turned end-over-end before using, then mixed in the following order:

- 1) 41-A
- 2) Wettable Powders
- 3) Other Additives
- 4) Liquid Pesticides

Do not pour 41-A directly from the bottle into the mix tank or hopper. It is recommended that the desired amount of 41-A be poured into a dry measuring cup or similar container, then sprinkled on top of the mix. This should be done as the mix water is entering the tank or hopper, or while the circulating pump is running. Circulation should be continuous until application is complete.
