

August Steering Committee Meeting – Key Conversations

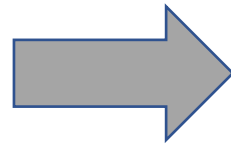

What 2022 success looks like:

- New Transportation and Biomass Recommendations
- Prioritization and guidance:
 - For budget
 - For New Biennium (including potential GWSA revisions, and issues that weren't taken up (e.g., Clean Heat Standard...))

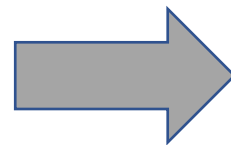

Steps to prepare fall Council Meetings:

AGENDAS: How should we sequence these conversations over our 4 planned meetings in the fall

METHODOLOGY: Particularly for prioritization, the VCC has struggled previously. What should we do differently?

KEY INPUTS: What presentations do we need ASAP? What does the full Council need to see?

- Budget process description
- ANR legal memo?
- Detailed cost curve analysis for mitigation actions (ready only late Sept)
- What else?
