

# Vermont Climate Council Subcommittee 2024 Assessment

As indicated in the Vermont Climate Council Governance document, all Climate Council subcommittee seats will be re-nominated in 2024. The terms will be for three years thereafter. **This form is for current subcommittee members only.**

1. What is your name?

2. Please indicate if you'd like to stay on the subcommittee(s) on which you sit.

A) If you indicate 'yes', you will **not** need to go through the nomination process again; you will keep your seat for another 3-year term.

B) If you indicate 'no', you will no longer serve on that subcommittee in 2024.

- Yes! I'd like to stay on the subcommittee(s) on which I serve for another 3-year term.
- No, I will not stay on the subcommittee(s) on which I serve.
- I'm not sure; I'd like to speak with the co-chairs of my subcommittee before I decide.

3. What specific expertise, lived experience, and/or representation do you feel would be a valuable addition to the subcommittee(s) on which you serve?

4. To support youth subcommittee members' participation, we are seeking to pair each one with an adult of the same subcommittee. If you are staying on as a subcommittee member in 2024, would you be willing to be a point person for youth subcommittee members?

This would involve:

- Being a trusted adult ally, someone to get to know a bit better than is possible in meetings
- Being available for follow-up on subcommittee meetings
- Answering questions or connecting them with someone who can

**Note:** Youth councilor & subcommittee members will be further supported by Vermont Energy Education Program and regular facilitated gatherings of all Vermont Climate Council/Subcommittee youth members. An adult point person on each subcommittee will be a valuable complement, but is by no means the only support available to them.
