

MEMORANDUM

To: Members of the Vermont General Assembly

From: The Steering Committee of the Vermont Climate Council

Date: February 15, 2022

Re: Vermont Climate Council Process for Review of Ongoing Technical Analyses Needs

We are writing to notify the Vermont General Assembly of the ongoing work of the Vermont Climate Council to review and prioritize the technical analyses needed to both meet the statutory requirements of the Global Warming Solutions Act, as well as further the implementation of Vermont's Initial Climate Action Plan (CAP). The Steering Committee of the Vermont Climate Council met on February 14 to review the list of technical analyses put forward in the CAP, as well as additional priorities that have surfaced since the adoption of the CAP in December. The Climate Council will meet on March 14 to further refine the technical analyses priorities and the capacity to complete them in the agreed upon timeline for their relevancy.
