

**Science and Data Subcommittee  
Vermont Climate Council**

**Meeting Agenda – October 25, 2023 (1:00 – 3:00)**

*Objectives*

- Clarify the role and workplan of the Science and Data Subcommittee in the context of the Council's emerging workplan and specifically related to the role of the group in the development of the next CAP.
- Review the current and planned contracted technical work, and develop a recommendation on priority additional technical work to support the Climate Action Plan update.

*Agenda*

- **Workplan and Subcommittee Role (20 mins):** Review the Council's emerging workplan, discuss the role of the Science and Data subcommittee in supporting that work, and the implications for the subcommittee's workplan.
  - **Expected outcome:** A sharper focus on the Science and Data Subcommittee expected role and workplan to support the Council work.
- **Public comment (10 mins)**
- **Overview of technical analysis (Total 75 mins):** Discussion on desired additional technical analysis related to resilience, adaptation, and mitigation. Briefly review ongoing and planned technical work. Discuss and seek consensus around initial recommendations for priority additional technical work to support the update of the Climate Action Plan.
  - **Expected outcome:** Initial recommendation on additional technical work.
- **Public comment (10 mins)**
- **Next steps (5 mins):** Confirm actions and next meeting.

*Note: Co-chairs will send pre-reads, such as the previous pathways analysis.*
