|--|---|--|--|--|--|--|--|
| Facility Condition Index (FCI)                       | The cost -weighted depleted value of the building compared to the total value of all its systems; overall percent of building useful life consumed by years in service. |  |  |  |  |  |  |
| Total Value of Assets                                | The total estimated replacement cost of all the assets listed in the form.  |  |  |  |  |  |  |
| Value of Assets per GSF                              | The Total Value of all Assets in the form divide by the Gross Square Footage (GSF) of the building.   |  |  |  |  |  |  |
| Facility Condition Index (FCI) Compared to Portfolio | The Facility Condition Index (FCI) of the building overlayed on the chart of FCI's for all buildings in the portfolio. Indicated by a red line in the chart.            |  |  |  |  |  |  |
| Calculated Remaining Useful Life( C-RUL)             | The current number of remaining years a system may be expected to perform in designed service.  |  |  |  |  |  |  |
| Expected Useful Life (EUL)                           | The total number of years a system can be expected to perform in designed service when new.   |  |  |  |  |  |  |
| Gross Square Footage (GSF)                           | The total square footage contained within the building for all floors/levels.   |  |  |  |  |  |  |
| Cost per Unit  | The estimated base cost for a single unit of a system. When multiplied by Quantity results in the total system cost.  |  |  |  |  |  |  |
