2022 School Facilities Inventory Report

Facility Name: NORTH COUNTRY SU | NEWPORT CITY ELEM SCHOOLS | 166 SIAS AVENUE, NEWPORT 5855 - Combination - Main Building

Explanation of Terms Projected Capital Planning Cash Flow The estimated replacement costs of systems as they expire annually. The cost -weighted depleted value of the building compared to the total value of all its systems; Facility Condition Index (FCI) overall percent of building useful life consumed by years in service. **Total Value of Assets** The total estimated replacement cost of all the assets listed in the form. Value of Assets per GSF The Total Value of all Assets in the form divide by the Gross Square Footage (GSF) of the building. The Facility Condition Index (FCI) of the building overlayed on the chart of FCI's for all buildings in Facility Condition Index (FCI) Compared to Portfolio the portfolio. Indicated by a red line in the chart. Calculated Remaining Useful Life(C-RUL) The current number of remaining years a system may be expected to perform in designed service. **Expected Useful Life (EUL)** The total number of years a system can be expected to perform in designed service when new. **Gross Square Footage (GSF)** The total square footage contained within the building for all floors/levels. The estimated base cost for a single unit of a system. When multiplied by Quantity results in the Cost per Unit total system cost. The amount of a system present in a building. When multiplied by the Cost per Unit results in the Quantity total system cost. Units The expressed unit of measure for a given system (GSF, EACH, TON, etc). **Ancillary Structures** Buildings on site that are typically known as portables, relocatables or temporary buildings.
