

REMOVE EXISTING LIGHT POLE

**\*\*From Berlin STPG SGNL(40)**

- xx. DESCRIPTION. This work shall consist of removing existing light pole(s) at the location(s) indicated in the Plans and as directed by the Engineer.

The work under this Section shall be performed in accordance with these provisions, the Plans, and Section 679 of the Standard Specifications.

- xx. CONSTRUCTION REQUIREMENTS. The Contractor shall remove and salvage the existing light pole assembly, including the luminaire, bracket arm, and pole; and remove and dispose of wired conduit, pull box, and concrete base. Existing wires shall be connected in a junction box at the location of the removed light pole such that the remaining lights continue to function. All wiring shall be performed in accordance with Subsection 679.07.

Excavated areas shall be backfilled with material acceptable to the Engineer.

- xx. METHOD OF MEASUREMENT. The quantity of Special Provision (Remove Existing Light Pole) to be measured for payment will be the number of each light pole removed in the complete and accepted work.

- xx. BASIS OF PAYMENT. The accepted quantity of Special Provision (Remove Existing Light Pole) at the location specified will be paid for at the Contract unit price per each. Payment will be full compensation for removing and disposing of the existing light pole assembly, wired conduit, pull box, and concrete base; performing any required excavation and backfilling; and for furnishing all labor, tools, equipment, and incidentals necessary to complete the work.

Payment will be made under:
