

TRASH RECEPTACLE

**\*\*From Barre City FEGC F 026-1(34) C/2**

xx. DESCRIPTION. This work shall consist of furnishing and installing trash receptacle(s) at the location(s) indicated in the Plans and as directed by the Engineer.

xx. MATERIALS. The trash receptacle shall be constructed of steel flat bar and tubular steel. Joints shall be fully welded and ground smooth where visible. All receptacles shall be 136 L (36 gallon) size, with a heavy duty polyethylene liner. Each receptacle shall include a steel lid with concentric opening over the liner. The steel lid shall be securely and permanently attached to the base. All steel components shall have a polyester powder coating with a color of forest green.

Trash receptacle material shall meet the requirements of Subsection 107.22.

xx. SUBMITTALS. Prior to ordering the trash receptacle, the Contractor shall submit Fabrication Drawings to the Engineer in accordance with Section 105. The Fabrication Drawings shall indicate materials, dimensions, tolerances, welding, fasteners, hardware, mounting, finish, accessories, and the manufacturer's warranty.

xx. FABRICATION. The trash receptacle shall be fabricated in accordance with the details shown in the Plans.

xx. INSTALLATION. The trash receptacle shall include a surface mounting system for permanently anchoring to a concrete surface. The trash receptacle shall be set level and plumb.

The trash receptacle shall be installed at the location indicated in the Plans, to the configuration shown in the Plans, and in accordance with the manufacturer's recommendations. All locations shall be field approved by the Engineer prior to installation.

xx. MANUFACTURERS. The following manufacturers are capable of supplying a trash receptacle that meets the requirements of these specifications. The Contractor shall select from this approved list or shall submit a proposed alternate manufacturer that can supply an equivalent trash receptacle that conforms to the Plans and these specifications.

Manufacturer: Creative Pipe, Inc.
