RFI #2 – Bolt sizes for drain tube support connection

The Request for Information (RFI) #2 dated 4/26/2016 has been received and found to be acceptable. Reducing the as-designed 7/8” bolts that attach the drain tube supports to the structural steel to 3/4” bolts of the same class will serve the intended purpose. As designed, there are conflicts between washers and the radius of the support angle, therefore a reduction in the washer size is reasonable.

You must provide notice to our fabrication Engineer, Ryan Foster, as to the date fabrication represented by these drawings will begin. Ryan must receive and acknowledge your notice at least seven days prior to that date, as per Specification 506.03. You may contact Ryan by phone at (802)828-0015 or email at ryan.foster@vermont.gov. Any material fabricated prior to the notification date is subject to rejection without further cause.

Sincerely,

Doug Bonneau
Project Manager

Cc. *Tom Mancini*, Resident Engineer
Chris Williams, Regional Construction Engineer
Ryan Foster, Structural Steel Fabrication Engineer
