IS RESTRICTION DAYTIME ONLY, OR DAY AND NIGHT? Day & Night

NOTES:

When giving the width of lane DO NOT build in an allowance for safety, etc. as this is done in Engineering. For example: If you have jersey barrier on both sides and there is a measured distance of 14' 0" between the two sides, do not put in less than the 14' distance under width of lane at narrowest point. Engineering has set standards for various load types for the required width needed for these moves.

Restrictions must be completed and sent to the Construction office. Resident Engineer to fax a copy to Motor Vehicles' Oversize Permit Section. **The Resident Engineer is responsible for submitting these with enough lead time to ensure that DMV has a MINIMUM of two weeks notice prior to the restriction taking effect.**

This sheet is intended to be used for long term restrictions such as one-way traffic on bridges and one-way detours, but not for daily restrictions controlled by flaggers of Uniformed Traffic Officers UNLESS oversize vehicles will not be able to pass through.

When in doubt, ASK. If you have questions or concerns please call 828-2593.
