9 Commercial Street
Hudson, NH 03051

May 21, 2015

Project Name: Richford Project #: BRF 0302(29)

Structure Identification: Bridge 6 over the Berry Brook

The following Precast Concrete Structure (28' x 6' x 29' Frame or Arch Type), Precast Concrete Structure (Pedestal Walls Abutment 1 and 2) and Precast Concrete Structure (Wingwalls 1 thru 4) details [Item 540.10, Precast Concrete Structures] for the above project (Vendor's Job # C22312) transmitted through SharePoint on April 22, 2015 and May 21, 2015 have been reviewed and are being returned herewith.

After much discussion we have decided to change the roadway profile which allows us not to drop the footing elevation of the arch which was shown on the marked up set that we originally sent back to you. We have changed our remarks on those drawings to reflect not changing the footing elevation. However, your resubmittal that we received today did not address all the changes requested from our last request. The design calculations that you submitted are acceptable.

All sheets need to be resubmitted. We need to have all the drawings resubmitted not just the two that you recently sent us.

Please note that we can not give any final approval until we receive the lifting loop calculations and transportation, handling and storage details, and notes about your cure method.

There shall be no fabrication done until all drawings have been approved.

Please remember that Jim Wild (802-828-6931) needs at least **Two weeks Advance Notification** with regards to fabrication dates of all the precast structures. Any material fabricated prior to the notification date is subject to rejection without further cause. **Also, please be reminded that when we give you a final approval of these drawings that a Pre-Production meeting will need to be scheduled with Jim Wild as per our specifications.**

If you have any questions, please contact me at (802) 828-0048.

Sincerely,
Carolyn W. Carlson
