

WOLVERINE TUBE, INC.

Plumbing and Refrigeration Service Tube

Wolverine is a global company capable of providing Plumbing and Refrigeration Tube to various international, national, regional and municipal specifications and code requirements.

The most common Plumbing Tube specifications are ASTM B88 for types K, L and M, ASTM B306 for type DWV and ASTM B280 for Refrigeration Tube. The material for Medical Gas Systems is covered by ASTM B819.

Our Regular Tube is manufactured to meet the chemical and mechanical properties of the applicable ASTM specification. However, Regular Tube may not fully meet ASTM dimensional requirements. When specified at order placement, Wolverine can supply Certified Tube to meet all requirements of the applicable ASTM specification, at additional cost.

← both 1" and 2" tubing must meet all requirements of ASTM B88 for type K

Wolverine Tube Inc. is certified to NSF International Standard NSF 61, Drinking Water System Components - Health Effects.

Plumbing Tube

Wolverine offers a wide variety of products used in applications such as underground water service, potable water distribution, drainage and vent systems, radiant and hydronic heating, fire sprinkler installations, medical gas service, and fuel oil and gas distribution systems.

Plumbing Tube is produced from copper alloy UNS 12200. Straight lengths are available in hard or annealed tempers. Coils are supplied in annealed temple.
