## Marlboro BRF 010-1 (43) Traffic Signage Narrative

### **Overview**

We are proposing to decrease the speed limit to twenty miles per hour into the work site and ten miles per hour across the temporary bridge. The plans illustrate how the speed decrease will be signed for the traveling public. Sheets 1-4 illustrate the sign package that will be in place from start of construction to finish. We will supplement the package with flaggers when construction activities dictate the use.

### **Deliveries**

Flaggers will be needed at times as deliveries arrive. Some will go to the staging area and some right to the area we are working in.

### **Traffic flow**

If we stop the flow of traffic it will never be for more than ten minutes. If any emergency vehicles are observed we will get them through the site immediately.

SIGN LEGEND	SIGN DIMENSIONS		SIGN COLOR	QUANTITY
	WIDTH	HEIGHT		
	IN	IN		
 W20-1	48	48	B/FO	4
 W20-1	48	48	B/FO	8
 R2-1	<del>18</del>	<del>24</del>	B/W	2
 R2-1	<del>18</del>	<del>24</del>	B/W	2
 W3-5	36	36	BW/FO	2
 G20-5aP	<del>18</del>	<del>36</del>	B/FO	2
 R2-1	<del>18</del>	<del>24</del>	B/W	2
 R2-6aP	<del>18</del>	<del>24</del>	B/W	2
 W3-5	<del>36</del>	<del>36</del>	BW/FO	2
 W24-1	36	36	B/FO	2
 W13-1	18	18	B/FO	2

24x30": minimum;  
recommend 30x36"

MUTCD shows the  
"conventional road" size as  
24x18" (two lines of text)

24x30": minimum;  
recommend 30x36"

We will not allow this as a  
regulatory reduction; if  
intended as a lead sign  
for the advisory speed of  
10 mph ahead, the W3-5  
is not appropriate to use.

Incorrect sign  
shown; see  
MUTCD - this is a  
plaque that is  
installed under the  
regulatory speed  
limit sign - text is  
"FINES DOUBLE";  
size is 24x18"

List as W13-1P

This is an advisory speed  
plaque that is installed under a  
warning sign (like the W24-1);  
color is black on F/O is  
indicated (but not shown).

Not a known town highway, I believe this is private
