1. Please provide a plan view showing the bridge rail posts, face of curb, back of curb, anchor bolt locations. All features should be annotated and dimensions should be provided from the face of curb to the front face of the rail and to the base plates and back of curb.

2. Per our previous discussion, the southern bridge rail posts were to have offset blocks between the bridge rail and the bridge rail post. Please revise the details for the southern bridge rail to show offset blocks and keep the bridge rail post and bridge rail base plate per Standard S-360A.

3. Please provide a plan view showing the location of the bridge rail components on pages 3 through 5 of the shop drawing submittal. We will also need the contractor to submit welding procedures for all welds.
