

Securing today
and tomorrow

Electronic Records Express

Disability Determination Services (DDS) and Social Security have created an initiative to increase the use of electronic options for submitting all kinds of records related to disability claims. We call it our Electronic Records Express.

There are many advantages to sending records through Electronic Records Express online or by fax

- Send patient, client and student records at your convenience;
- Submitting information directly to Social Security, helping to expedite decisions on disability claims;
- Save the costs of copying, paper, toner, and postage; and
- Eliminate the need for follow-up associated with the slower speed of traditional mail.

Sending records electronically is fast and easy

Electronic processes can make it quicker and easier for medical and other claimant records to be transferred securely and directly. This improved process eliminates the wait for mail to arrive and ultimately speeds up processing, so we can give the claimant a decision sooner.
