*2025 based on benefits issued year-to-date (July 2024 - March 2025).

NOTES:

CashOut refers to households comprised only of SSI recipients or people age 60+ whose benefit amount is direct-deposited to their bank account instead of provided on an EBT debit card.

Economic trends, policy changes and federal legislation affect participation and benefits, e.g., 1981 Omnibus Budget Reconciliation Act, Hunger Prevention Act of 1988 and 1996 Personal Responsibility & Work Opportunity Reconciliation Act.

The 2008 Farm Bill raised the minimum benefit for 1-2 person households and made it easier for those with retirement or education savings to participate.

In 2009, Vermont raised its gross income eligibility limits from 130% of federal poverty lines (FPL) to 185% FPL to let the program reach more financially stressed Vermonters.

In March 2020, COVID 19 pandemic hit. Emergency allotments (max allotment by household size) were issued through the rest of FY20, FY21, FY22, and through March 2023. Those emergency allotments and the on-going benefits are represented here.

In October 2024, the 3SVT allotment tables were updated to reflect the increases to the thrifty food plan.
