

Name: Marshall

Age: 10yrs

My Favorite Things:

I enjoy being outdoors. I enjoy climbing trees, going on hikes (especially if they are flat), and riding my bike. I like to play Nerf guns and love collecting and playing with Pokémon cards. I also enjoy playing Roblox and other video games.

I am good at sports, especially basketball. I can run fast and love staying active!

Things I do not like:

I don't like being around a lot of chaos. Yelling and screaming make me uncomfortable. I want to be in a calm and peaceful home. I do not want to be around people who use substances. I also don't like it when people take my things without asking. It's important to me to feel safe, respected and heard.

Favorite Foods:

I like pizza and chicken nuggets. I enjoy snack food and sweet treats. I can be a picky eater sometimes and I sometimes struggle with trying new foods. In the past, I've had a hard time eating healthy foods and choosing them instead of sugary or salty processed foods. I am working slowly making healthier choices.

What I want in a family:

I am looking for a family that likes to do activities together. I want a family that is active and enjoys being outdoors and staying busy. I would love a family with animals, although I may still need help remembering to be gentle and not too rough.

Having my own room is important to me. I would also like the opportunity to participate in organized sports.

What I want families to know about me:

I am pretty active and good at most sports. I like to stay and be on the move. I enjoy playing games with other people, both inside and outside.

What we want families to know about the youth:

Marshall is an active youth who likes to stay busy and entertained. He enjoys asking questions and wants to understand what is happening in his life and around him. Marshall has been through a lot, and he will need a family that understands childhood trauma and how it can affect kids both now and over time.

It will be important for a family to understand his past experiences with his biological family and how those experiences may still impact him today. Marshall will benefit from a home that provides structure, clear routines, and consistency. He is currently receiving speech therapy for a speech impediment and will need a family that stays engaged with his school and ensures his educational needs continue to be met.

Marshall may test boundaries at times to see if adults will give up on him. He has experienced disappointment in the past and needs reassurance that his family will remain committed to him. Building trust and attachment will take time, and the bonding process will not happen overnight.

He needs a family who will stand by him, even when he makes mistakes-one that seeks to understand the “why” behind his behaviors rather than focusing only on the consequences. With patience, consistency, and unconditional support, Marshall will continue to grow and make positive adjustments.
