

Robbie (he/him), age 12

My favorite things:

I really enjoy staying active and working with my hands. Some of my favorite things to do are fishing, racing remote-control cars, helping with farming, and farm chores, playing sports, and going hunting.

Things I do not like:

I value being respectful and kind to others. I tend to enjoy active, hands-on activities more than things like reading or board games.

Favorite Foods:

Some of my absolute favorite foods are coffee ice cream, mac and cheese, goulash, and fish sticks- I could eat them anytime!.

What I want in a family:

I would do best with parents (s) who are active and engaged, and who enjoy spending time together as a family. I like well-behaved pets and would be happy with either a mom or dad or a single parent. I do best in a home that has structure and stays busy but also makes time for relaxing and unwinding together.

What I want families to know about me:

I enjoy being active and athletic. Sometimes I can feel worried and may act out, and during those times I need support from a patient adult to help me work through those moments. It's very important to me to stay connected with my loved ones, especially my siblings. I would love a home in a rural area or on a farm. I also love to laugh-funny videos, especially cats being scared of cucumbers always makes me laugh.

What we want families to know about youth:

Robbie is a kind-hearted and empathetic youth who forms strong connections with the people he cares about. He loves being outside and spending time with friends. Robbie does best in a home with structured, engaged parents who provide clear expectations and supportive boundaries. He benefits from having clearly defined rules and being included in planning. While transitions can be difficult at times, they are much smoother when he has

consistency, preparation, and a steady routine.
