

**Project Summary:**

Charter delivers a wide array of broadband, voice, and video services to residential and business customers through its Spectrum brand. Our standard residential internet speed offering is 100 Mbps x 10 Mbps with no data caps, no usage-based pricing, no modem fees, and no contracts or early termination fees. Spectrum Internet Gig service offers speeds up to 940 Mbps download. Importantly, Charter uses straightforward, uniform nationwide pricing for all of its residential services meaning customers throughout the State of Vermont are offered the same general packages and pricing as customers in New York, Florida, Texas and other states.

On December 30, 2020, Charter completed all necessary construction on the network expansion of two awards received by the Vermont Department of Public Service under the Connectivity Initiative RFP. Specifically, Charter extended its network to all eligible locations in Attachment E consisting of 156 passings in the towns of Barnet, Barre Town, Orange, Peacham Plainfield and Washington.

**CERTIFICATION**

Charter Communications hereby certifies that it is capable of providing Internet access at speeds contained in its Proposal to all of the locations listed in Attachment E.

Paul S. Schonewolf
