MEMORANDUM

TO: LAW ENFORCEMENT AGENCIES
FROM: AMANDA BOLDUC, TOXICOLOGY SECTION SUPERVISOR
SUBJECT: 2023-2024 DMT REFURBISHMENT PROJECT
DATE: OCTOBER 23, 2023
CC: LEGAL COMMUNITY

Over the course of the next year the VFL will be removing every DMT evidential breath testing instrument from the field and returning them to the manufacturer to be completely refurbished. The plan is to take 5-10 instruments each month until all units have been completed. Once the first batches of instruments have been done we will replace instruments with refurbished ones as we remove the old. However, we do not have enough spare instruments to allow us to swap them out in the beginning. As such, some agencies will be without a unit for an extended period of time. We are cognizant of the needs of the areas and are strategically removing units for the refurbishment. We appreciate your patience at this time and encourage cooperation throughout agencies to share their DMT as we work through this process.
