MEMORANDUM

TO: STATES ATTORNEYS; DEFENDER GENERAL; LAW ENFORCEMENT OFFICERS,
DATAMASTER DMT SUPERVISORS
FROM: AMANDA BOLDUC, TOXICOLOGY SECTION SUPERVISOR
SUBJECT: NEW DATAMASTER DMT PIC PROCESSOR CHIPS
DATE: NOVEMBER 30, 2017
CC: TRISHA CONTI, HEATHER BROCHU

The Vermont Forensic Laboratory Toxicology Section has performed a hardware upgrade to the DMT evidential breath testing instrument. Beginning in September of this year, we have worked to exchange the PIC Processor on the primary controller board of each instrument. This update streamlines the software communication between the DMT and the Guth 12V500 Simulator. This update does not change the user interface software or the analytical algorithm.
