You've got a grant on the way via pink mail for the Datamasters to be purchased in this Federal fiscal year; we will send you another grant for the next Federal fiscal year.

This year's grant amount is up to \$125,000 for the period ending 9/30/09; I have up to \$325,000 set aside for next Federal Fiscal year to finish it up. We rounded the figures up from your original estimate for unanticipated complications, but we don't expect you will actually use every dollar!

The way the grants work is that you make the purchase according to State policies and procedures, pay the bill, then send us the bill and the appropriate paperwork, and we will reimburse you.

State agencies are historically the slowest in submitting the reimbursement paperwork, so we will need you to ensure that the paperwork for this FFY's purchases is sent to GHSP by the end of October, because once we close out the Federal fiscal year, we can no longer pay for activity performed during that fiscal year. It's not a problem, it just means the paperwork needs to be done at the end of the FFY; state agencies often don't even start thinking about that until July is looming, and that will be too late. But, as long as your accounting folks know the timeline, it shouldn't be any problem at all. That's why I was asking how many units you could get delivered and paid for by 9/30 this year.

Hi, Jeannie, could you send me an e-mail, outlining how the money for the replacement datamasters will be coming to VDH? (e.g. by ____, \$120,000 will be provided to VDH via grant; by ____, \$240,000 will be provided etc.). Our business manager needs something in writing, thanks, Mary.

8/5/2009

Jeanne, I just got the information from NPAS that the date can be met for 15 instruments. DMTs with printers, simulators, maintenance parts, and training materials for 3 additional counties will be [best estimate] \$104,700. Thanks for your patience.

Bob

We're ready to issue a project agreement, if you agree you can order, receive and pay for the Datamasters by September 30, and bill us by October 15. What do you think?

Jeannie

Jeanne, this is what Bob came up with for numbers:

Estimate to spend \$123,000 in Fed. FY'09 and \$313,000 in Fed. FY '10 for instruments, printers and training materials. The detail of testing, training and deployment will be provided once information regarding the specific instrument and printer models is determined.

Hopefully this helps, and we apologize for the delay in responding, Mary.
