

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 13, 2013

All Operating Reactor Licensees
(See Enclosed List)

SUBJECT: IMPACT OF FUKUSHIMA-RELATED ACTIVITIES ON NRC OPERATING
REACTOR REGULATORY AND LICENSING REVIEWS

As a result of the Fukushima Dai-ichi nuclear power plant accident in 2011, the Nuclear Regulatory Commission (NRC) conducted a methodical and systematic review of the NRC's regulatory requirements, programs, and processes. This review resulted in a number of recommendations to ensure that appropriate safety enhancements are implemented at nuclear power plants. The NRC continues to review licensee responses associated with the recommendations. Recognizing the finite set of resources and skill sets to support these reviews and as discussed in SECY-11-0137, "Prioritization of Recommended Actions to be Taken in Response to Fukushima Lessons Learned," the NRC continues to assess and redefine priorities while ensuring that this process does not displace ongoing work that has greater safety benefit, work that is necessary for continued safe operation, or other existing high-priority work.

Through this assessment, the NRC has identified schedule impacts to some licensing reviews. To foster a common awareness of project schedule expectations, we will continue to maintain routine communications with licensees through the NRC project managers. We encourage you to communicate the safety significance and operational needs associated with licensing reviews you have requested, and those that you may request in the future. This will better inform the allocation of NRC resources in addressing these licensing reviews.

The NRC will continue to assess and redefine priorities, consistent with the agency's mission to protect public health, safety, and the environment. Resource allocations and schedule expectations will be made to ensure timely licensing reviews, based on the level of safety significance and operational needs associated with the action.

If you have any questions about this matter, please contact your NRC project manager.

Sincerely,

A handwritten signature in cursive script that reads "Michele G. Evans".

Michele G. Evans, Director
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

(See Enclosed List)

**SUBJECT: IMPACT OF FUKUSHIMA-RELATED ACTIVITIES ON NRC OPERATING
REACTOR REGULATORY AND LICENSING REVIEWS**

As a result of the Fukushima Dai-ichi nuclear power plant accident in 2011, the Nuclear Regulatory Commission (NRC) conducted a methodical and systematic review of the NRC's regulatory requirements, programs, and processes. This review resulted in a number of recommendations to ensure that appropriate safety enhancements are implemented at nuclear power plants. The NRC continues to review licensee responses associated with the recommendations. Recognizing the finite set of resources and skill sets to support these reviews and as discussed in SECY-11-0137, "Prioritization of Recommended Actions to be Taken in Response to Fukushima Lessons Learned," the NRC continues to assess and redefine priorities while ensuring that this process does not displace ongoing work that has greater safety benefit, work that is necessary for continued safe operation, or other existing high-priority work.

Through this assessment, the NRC has identified schedule impacts to some licensing reviews. To foster a common awareness of project schedule expectations, we will continue to maintain routine communications with licensees through the NRC project managers. We encourage you to communicate the safety significance and operational needs associated with licensing reviews you have requested, and those that you may request in the future. This will better inform the allocation of NRC resources in addressing these licensing reviews.

The NRC will continue to assess and redefine priorities, consistent with the agency's mission to protect public health, safety, and the environment. Resource allocations and schedule expectations will be made to ensure timely licensing reviews, based on the level of safety significance and operational needs associated with the action.

If you have any questions about this matter, please contact your NRC project manager.

Sincerely,

/RA/

Michele G. Evans, Director
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
